WE ARE NAMED FOR OUR TWO DEFINING INFLUENCES - LES ALPES FRANÇAISES AND DOING THINGS DIFFERENTLY, BENDING THE NORM.

Lé: 01. The (definite article)  
02. An homage to our years fitting ski boots in Val-d'Isère.

Bent: 01. Simple past tense and past participle of bend.  
(adj.) 02. Different from the normal or usual.  
(adj.) 03. Strongly inclined or determined: "we are hell bent on making good products."  
(adj.) 04. The defining characteristic of a sock...

We craft intelligently designed technical socks, base layers and accessories, blurring the lines between luxurious comfort, performance and style.

Le Bent's commitment to performance, unrivaled comfort and sustainability are visible across all of its merino-based lines that are built for the rider's lifestyle, whether that be snow, trail run, mountain bike or anything in between.

"Our ambition is to inspire good times and adventure in the products we make and lifestyles we lead. We create products we use ourselves and these products enable our global tribe to lose themselves in their outdoor experiences."

FOR EXPERIENCES THAT MATTER

TECHNOLOGY

# MERINO WOOL + RAYON FROM BAMBOO

## SIGNATURE BLEND

They need no introduction, just a helping hand or foot to come together. On paper, it's an unlikely romance - merino and bamboo. Although the latter is technically a grass, and therefore beloved by the former... What makes the two products so compatible is their differences.

Individually rayon from bamboo and merino wool are world-class materials, but combined, they form a bespoke yarn that redefines what we thought was possible in a fabric.

## SIGNATURE BLEND: BAMBOO & MERINO

### MERINO WOOL

Peerless when it comes to performance, merino wool has been the benchmark for technical fabrics for centuries and still outperforms any human made synthetic copy... not withstanding natural combinations à la our signature fabric.

Ever seen a cold sheep? Ever seen a hot one? How can a creature be woolly in a warm climate? The mind boggles. But the wool reigns supreme as a thermo regulator. Throw in its anti-bacterial, moisture wicking and odourless properties and it's easy to see 'why merino?'

### RAYON FROM BAMBOO

If Merino is the prized pony of the fabric world, bamboo is very much the dark horse. We take the rayon from bamboo fibre which is as smooth and luxurious as silk and cashmere. Far softer than an already soft merino fibre, ultra breathable in its own right and with the ability to diffuse static electricity, it's perfectly suited as a first on skin layer, and the perfect partner to merino, not least because it's a grass and sheep love grass right?

Being a part of the grass family, it makes it an extraordinary plant that grows rapidly in most climates with little water and no pesticides. As a result, it is one of the most environmentally friendly and sustainable natural resources out there.

## SIGNATURE BLEND: ADVANTAGES

### 01 NO ITCH TECHNOLOGY

Rayon crafted from bamboo has a luxurious softness similar to silk and cashmere, and a springiness you'd expect from the almost elastic plant. The fibres are smoother and rounder with no sharp spurs to irritate the skin. Those with irritations to merino tend to have no reaction to our Signature Blend. It's itch free comfort, so soft and comfortable you'll want to sleep in it. And we do...

### 02 TEMPERATURE REGULATING

A powerful insulator that naturally regulates body temperature in all conditions, warm in the cold and cool in the heat. The air trapped inside the micro fibre gaps retain and regulate the thermal energy created by the body. As the body heats up, any moisture is evaporated, cooling the air between the skin and fabric. A natural thermostat that leaves you regulated day in day out.

### 03 KEEPS YOU DRY

Rayon from bamboo and merino provide a leading wicking agency. The fiber cross-sections are covered with micro-gaps giving the fabric leading moisture absorption and ventilation properties. Naturally moves sweat away from the skin leaving you drier longer thermostat that leaves you regulated day in day out.

### 04 ODOUR CONTROL

Helps control odour producing bacteria by delivering a dry, moisture free environment that keeps you hygienic and odour free even when worn multiple times - trust us, as (sometimes) unwashed outdoor guru's, we've tested this one almost excessively...

### 04 UV50+ PROTECTION

Our signature blend comes with a UV50+ rating.

## SUSTAINABILITY

We don't need to tell you synthetic materials are bad for the environment, the clue is in the name. They're unnatural.

Our raw materials are the exact opposite. Merino wool and bamboo. We use ethically sourced nonmulesed merino wool of the highest quality and when it comes to bamboo, well, as a crop bamboo makes a strong case for being one of the most sustainable. It grows incredibly easily, very rapidly, requires minimal water and zero pesticides.

# ATHLETE EVOLVED

They spend more time breaking trail or sending the biggest lines. So we partnered with them to innovate and develop products built specific for purpose.

## CODY TOWNSEND

Notably one of the highest regarded big mountain free skiers of this generation. Cody Townsend has a long list of accolades under his belt including the epic tick list he's gone after as showcased in his series 'The Fifty Project' – where he decided to not only ski down fifty of the best big mountain lines in North America, but also climb each of them too.

Cody has taken aim on some of the biggest, burliest lines and has learned (probably more than most) how the right gear can make or break your time in the backcountry.

"When it comes to innovating products, these guys are listening to their athletes; some of the best skiers, climbers, mountain runners of the world to create new and innovative products that work better for the best, but also work for the everyday consumer even better. So yeah, that's it.. that's why I love Le Bent and joined up with them."

- Cody

ELYSE SAUGSTAD

Sorry Cody Townsend, you're not the only one who can take the crown on burly lines and big mountain feats... you'll have to share that one with your wife!

A third-generation Alaskan, Elyse has one of the longest lists of accolades we've ever cast our eyes over. Including Freeskier Magazine's "Female Skier of the Year", two times Powder Video Awards' "Best Female Performance", multiple Freeride World Tour Wins & her name ranked on ESPN's "Top 50 Women In Sport". She now continues to raise the bar not only for herself, Cody also needs to keep up too.

"I joined Le Bent because I like to work with companies that don't just use me for my athlete recognition but actually want to truly work with me to develop the best possible product. Already I am stepping in to a co-lab on a women's sock and that's exciting for me because socks are such an important and very specific fitting piece of gear for skiing. If your socks don't fit perfectly and the material is crap you're going to have a bad day of skiing, no thank you."

- Elyse

SAMMY CARLSON

With eight 'X Games' medals (four of them Gold), podiums on the 'Dew Tour' and numerous wins in Big Air events, Sammy Carlson is a mastermind in competition. Though strip away the brand banners, crisp night air under show lights and you'll find Sammy in his element - the backcountry.

His vision for finding new, untouched lines is inspired and there are few riders who will drive themselves towards the unimaginable as Sammy does. Especially on natural terrain.

"Describing comfort after a long day in neg 20 is easy; if you're warm, dry and still good to get down then you've nailed it. The crew at Le Bent live by this simple ethos and, although I didn't believe it was possible in a sock, we went down the design path to craft a sock which will keep you going... and keep your feet looking damn-fine when those boots come off."

- Sammy

### LE SEND - THE WORLD'S FIRST SPECIFICALLY DESIGNED BACKCOUNTRY SOCK

Take what you thought of the term 'power couple' and flip it on it's head. We knew there was power in pairs but when we teamed up with two of the world's best pro freeskiers in their respective class and put them together to design Le Send - we discovered the ultimate pair.

The CODY PRO MODEL - built for long days in boots, praying away the blisters on the way up, and for the ultimate send!

The ELYSE PRO MODEL - a women's specific fit designed by Elyse for the way down, crafted with Le Send as the baseline showcasing a shorter leg length, foot length and narrower calf compression. Wrapped in a vibrant coral colourway.

#### FEATURES:

FW21 COLLECTION

# THE HEAVIER THE WEIGHT. THE WARMER YOU'LL BE.

The term 'first-on-skin' doesn't come lightly to us. We meticulously design every weave of our Signature Blend to provide maximum wear and long-lasting performance in the elements. Outer layers and base layering are two things that work in harmony, without one you'll be the first to head home.

Each weighted option in our base layers will encourage seamless movement without compromising comfort and temperature control. So you can focus on getting out there, we'll take care of the rest.

CORE 200 BOTTOM

Our lightest base layer bottoms, this is a super soft high performance layer that loves being on skin and won't irritate the most irritable of skin types thanks to our Signature Blend. This blend has the added bonus of superior temperature regulation, moisture control and stay odour free far longer than you would think possible. The 200gm lightweight bottoms are crafted with contoured panels that gently hug your body in the right places, flatlock seams to stop the chafe and a wide waistband that disperses pressure and floats atop your skin for the ultimate in comfort and performance.

CORE 200 3/4 BOTTOM

All the technical benefits from our full length 200gm bottoms in a ¾ cut. This super soft performance layer concludes at the mid calf-length making it a perfect accompaniment to ski boots and other high cuff footwear that you can't have wrinkled or bunched up fabric beneath.

WOMENS BASE LAYERS

CORE 260 CREW

The perfect synthesis between warmth, comfort and performance, our midweight 260gm base layer is the warmest in our range. It handles anything from the coldest days in the alpine to cruising around town early mornings or late in the day après. The Signature Blend is even beloved by those with merino irritations making it an unrivalled on-skin layer. The contoured fit, chafe free seams and 4-way stretch all work with your body in harmony for a baselayer that delivers the ultimate in comfort and maximum performance.

CORE 260 BOTTOM

Our warmest base layer bottoms are as comfortable being a single layer in cool weather or a first on-skin layer in the coldest of snowy conditions. Soft on skin and smart with temperature. These midweight bottoms remain highly breathable and stay stink free long after you. The design works with your body seamlessly for all day comfort with flatlock seams to prevent chafe, contoured panels, 4-way stretch and a wide waistband to distribute pressure and ensure a firm hold.

## BALACLAVAS

### CORE BALACLAVA TECH 260

The warmest balaclava for burly arctic conditions. Just like its lightweight counterpart, it's luxuriously soft and ultra breathable but with an additional full mouth and nose mesh panel so you don't need a snorkel and you won't choke after face shotting yourself turning in pow.

### BALACLAVA 260

Turn up the temperature-dial and warm your head, neck & face with the heavy weight 260gm balaclava. The super-comfortable feel will keep you warm and feeling comfortable in the coldest of environments.

## BALACLAVAS

### KIDS CORE BALACLAVA 200 & KIDS BALACLAVA 200

Super soft and warm, our kids balaclava provides protection against frigid winter winds and the sun's rays. Ultra breathable, super comfortable and very versatile with the ninja hinge design, it can easily be worn up over the nose or pulled down under the chin. Your kids won't want to leave home without it and will last all day with it.
