TWIN CHANNEL

FLAT BOTTOM BASE BOARD CONSTRUCTION

FERNANDO LINE:

Artist: Fernando Elvira (Spain)

Construction: 3D Poplar Wood Core & Biax Glassfibre; regular Side Channel

Flex: medium

ANYMA LINE:

Artist: Lukas Goller aka Sakulrellog (Austria)

Construction: 3D Poplar Woodcore & Torayca Carbon Fiber; regular Side Channel

Flex: stiff

FK POWSKATE:

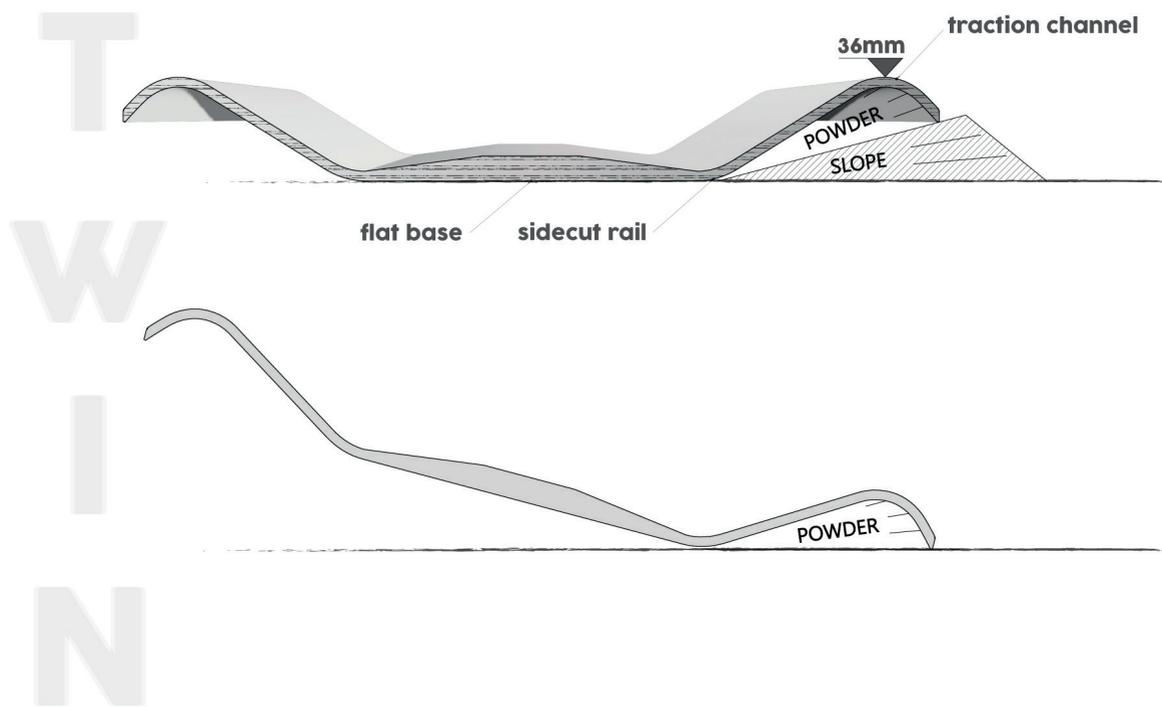

Artist: Chirstoforo Daoulkas

a.k.a. Greco (Grec)

Construction: 3D Poplar Woodcore & Biax Glassfibre; regular Side Channel

Flex: stiff

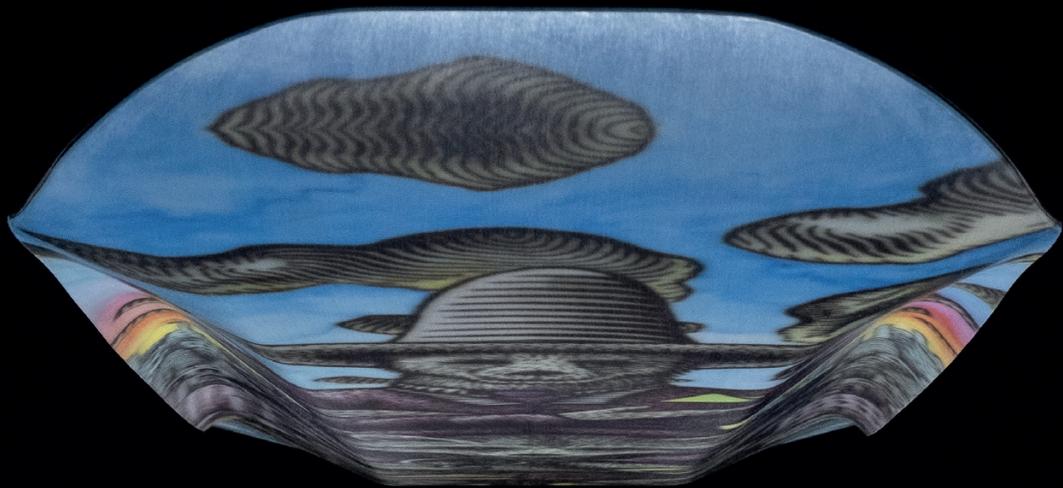

FLAT BOTTOM BASE CONSTRUCTION

Freestyle Oriented

Our trusted 3-dimensional design features a flat running area with its outside channels and edges. The flat area creates clean lift and playful handling. The Channel allows you to tilt the Board and turn on the Inside Edge. The Channel & outside Edge gives you control and drive through a turn. This design is made for convenient handling because its very agile and easy to initiate turns. It feels very naturall and this construction offer the perfekt allround solution from powder to jibbing parks and riding urban areas.

QUAD CHANNEL

3D BOTTOM BASE BOARD CONSTRUCTION

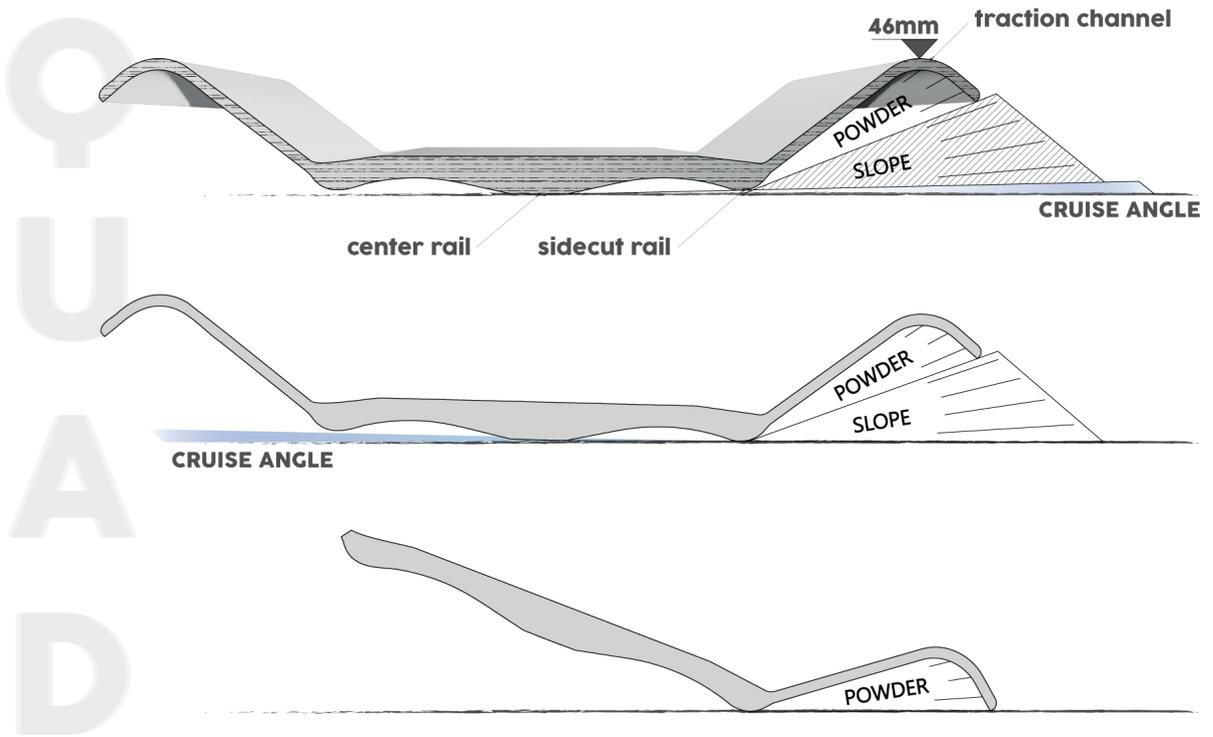

AESMOSE LINE:

Artist: Lukas Goller aka Sakulrellog (Austria)

Construction: 3D Poplar Woodcore & Torayca Carbon Fiber;
extended Side Channel

Flex: stiff

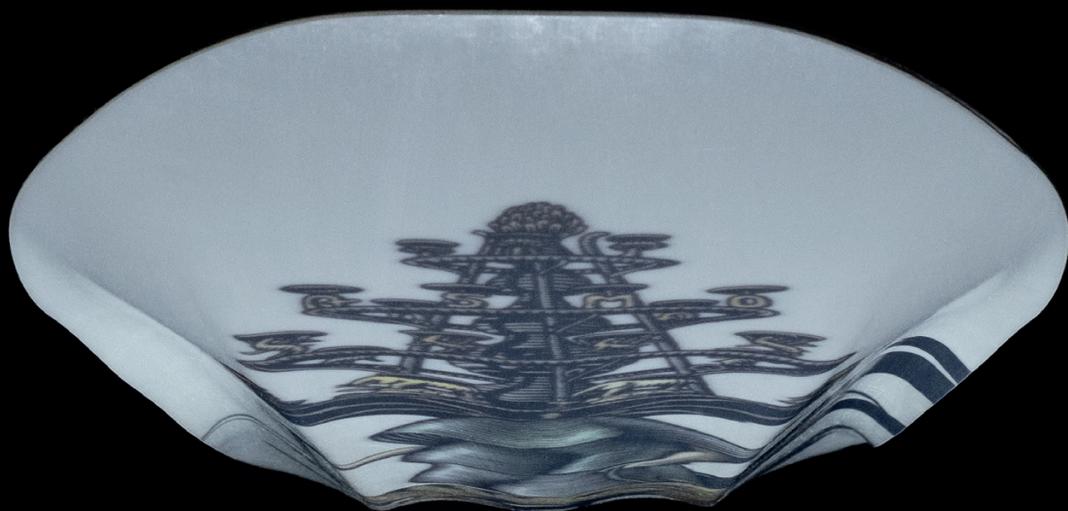

3D BOTTOM BASE CONSTRUCTION

Freeride oriented.

After 4 years of R&D we are proud to introduce our new 3D bottom contour, adding even more stability, drive, and maneuverability to our new freeride driven shapes! Especially in higher speeds and harder packed snow this construction shines. In powder this helps as well in step terrain for truns and traversing and of course adds precision to your riding. With this added control the outside Channels got upgrades in length and we increased the max tilt angle of our board. The inside Edges are a game changer riding slopes, traversing packed snow and enable you to carve

SHAPE FAMILIES

The **PHANTOM SHAPES** have deep Swallow Tails. Those deep tail shapes offer a maximum flotation and let you control turns with ease.

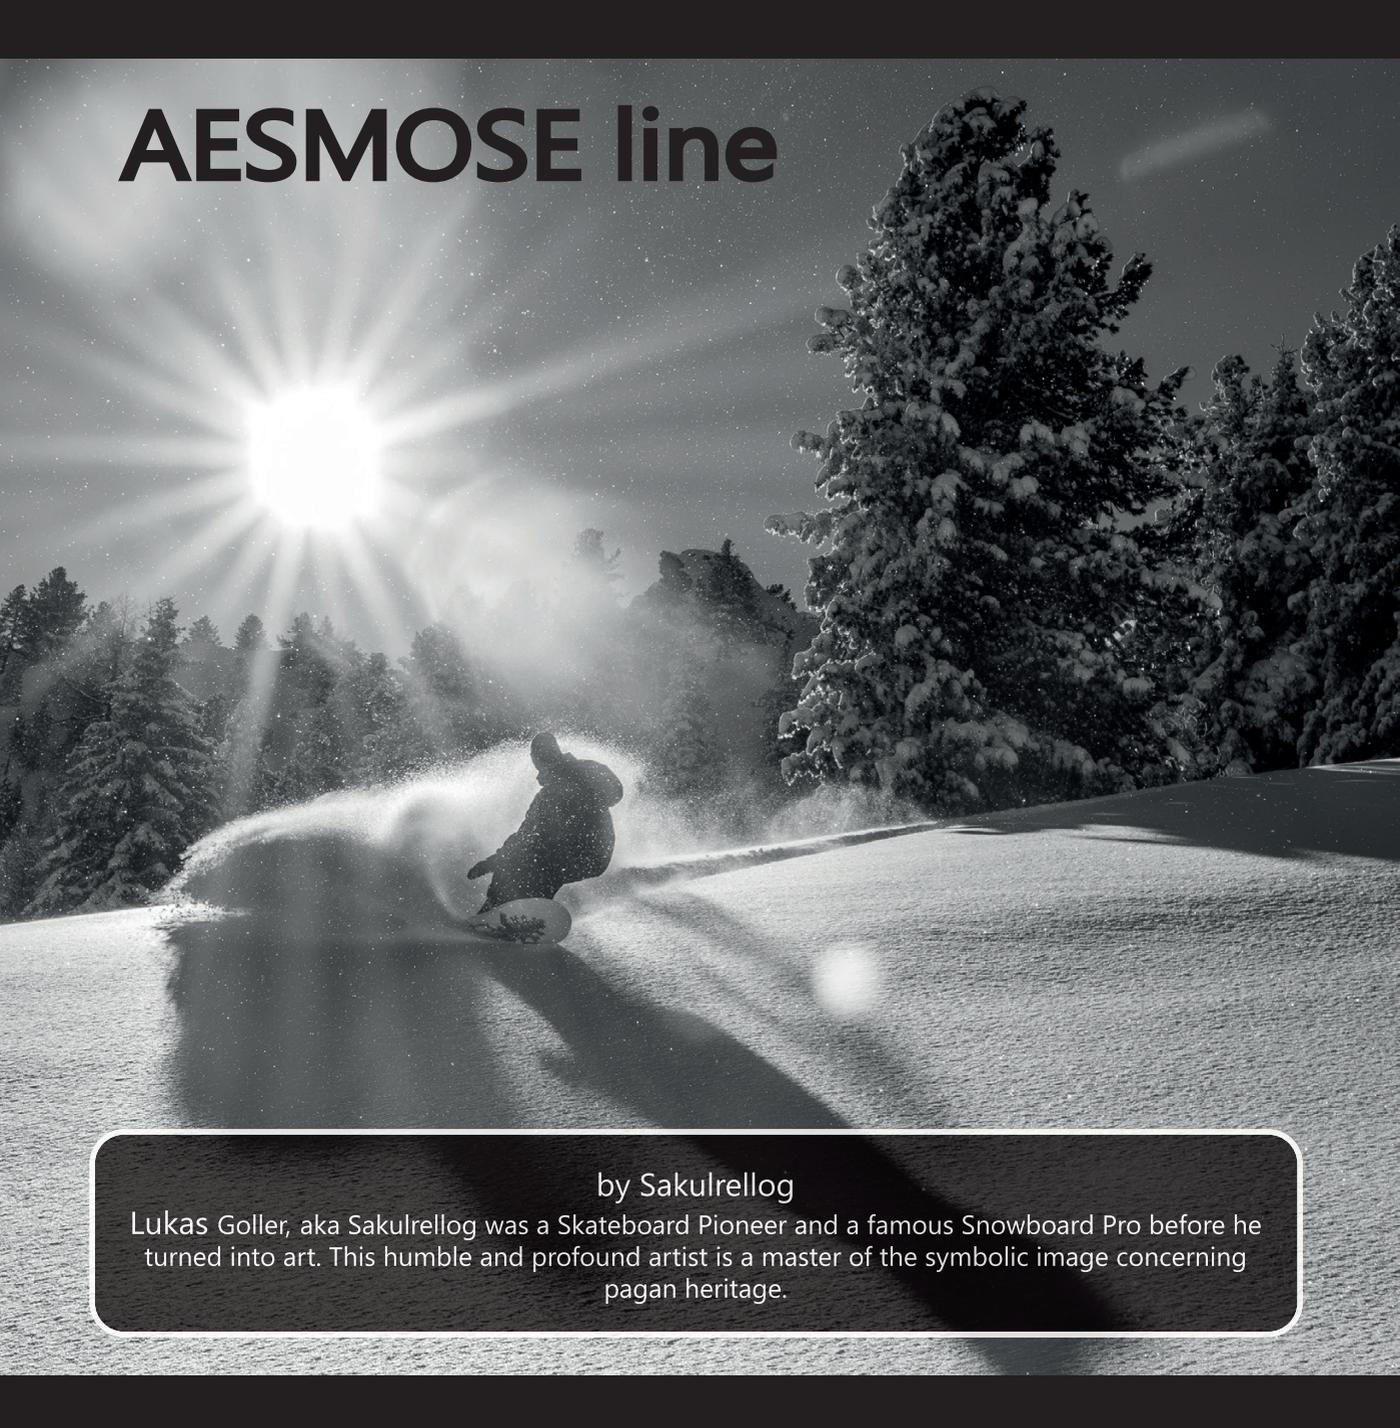

The **BLUNT FAMILY** consists of Shapes from Square Tails, Rounded Square to Squash Tails. A lot of surface area, especially under the back foot enables a lot of lift whilst keeping control for freestyle abilities.

The **SI FAMILY** consists of Round to Pin Tails and Hybrid shapes. From your All-round Freestyle Board to modern All-Mountain abilities those shapes can do it all while keeping it loose.

The **ZSIGMONDY SHAPES** have a reduced Swallow Tail. Short running length combines high flotation ability with control build in its DNA.

FERNANDO Elvira line

Fernando Elvira, born in the Basque Country, is painter, photographer, a sculptor and a video artist. He always loved skateboarding and therefore he left his chemistry studies in Madrid to direct the skate magazine TRES60 in Bilbao. Already at that time he revolutionized the vision of skateboarding through his photographs and articles. In 1993 he started his career as a solo artist.

His art deals with symbols and reduction. Since beginning of humankind symbols played a major role in society. Now more than ever. Fernando Elvira unites ancient ethnic symbols with contemporary ones. This symbiosis is impressive because it is disturbing and harmonic at the same time. His pictures always convey cryptical messages with a lot of room for interpretation.

His visual language is legendary in the world of Skate- and Snowboarding. He cooperates with brands like Element, Salomon, Krooked and Magenta. For his Quiver with Äsmo he created some very engrossing and beautiful pieces of art and brought some colors back into the game.

ANYMA line

A snowboarder is seen from behind, riding a snowy mountain slope. The snow is deep and appears to have been sculpted into various shapes, possibly by wind or the snowboarder's previous runs. The sky is a clear, bright blue. The overall scene is one of a pristine, high-altitude winter environment.

by Sakulrellog

Lukas Goller, aka Sakulrellog was a Skateboard Pioneer and a famous Snowboard Pro before he turned into art. This humble and profound artist is a master of the symbolic image concerning pagan heritage.

He is interested in all kind of rites around the Alps, with their inherent characteristics and singular forms of expression. He tries to retrieve those old spiritual ideas into our present time to fuse it with his own style of interpretation. This combination is unique and fascinating at once.

All in all, his art has always some kind of spiritual approach, which is mostly lacking today. To describe his personality in a few words is not that easy, because he is many things at the same time: half Italian - half Tyrolian, half cat - half human, half Rick and Morty - half Trailer Park Boys, half artist - half autistic, half thinker – half creator and half Lukas Goller.
