Smart Function

FIDLOCK®

Fidlock fasteners use high performance magnets to make locking and unlocking easier.

The magnets help guide the fixings into place with a satisfying click. Use the alignment guides on the side of the bag and the fixing will lock.

The twisting and releasing mechanisms turn the magnets so they actively help release, making it simple, even one handed.

Introducing the 3rd generation Kart System featuring Fidlock magnetic fastenings. Strong, secure and easy to use, our modular luggage components simply align and click together.

Fidlock fasteners are based on a unique award winning technology which is revolutionising fastening systems. The Fidlock principle brings together the advantages of magnetic fasteners and mechanical locks. The result is a new dimension in terms of functionality, safety and security.

Smart Design

We take a very real world approach to design. Form must follow function as we continue to innovate.

We have increased the strength of our bags by over 50% by refining the construction of our fabrics

All our handles are ergonomically designed and placed to give the best lift. Padded and reinforced to make carrying bulky loads easier.

Our G Clips have been engineered to allow webbing to run smoothly so they tighten & lock easily but release simply.

All our webbing daisy chains are sewn raised & ready to use

We design-in compatibility so that consumers can invest in a range of Snokart products that can be used together seamlessly.

Smart Solutions

The SnoKart range is built to be a fully modular, smart luggage solution that makes getting to the slopes easy. From our range of Karts, through to our lightweight Airliners, all our products protect their contents and offer flexible solutions for transporting your gear seamlessly. All SnoKart bags are designed to be used together using a range of smart functions which allow for smaller bags and packs to be combined with larger, rolling styles, for a single-handed pull.

Fidlock

Fidlock fasteners are based on a unique, award-winning technology which is revolutionising fastening systems. The Fidlock principle brings together the advantages of magnetic fasteners and mechanical locks. The result is a new dimension of functionality and security.

With the help of the alignment guides on the side of the bag, the Fidlock magnets help guide the fixings into place to securely lock together the two modular bags.

Strap In Modular System

The Strap In range is designed to be fully modular and work together seamlessly. Using the G-Clip compression straps and Webbing fixing points, smaller bags and packs can be easily strapped to larger, rolling luggage for easy transportation. All SnoKart compression straps finish with a G-Clip fixing point, opening up a wide range of possibilities and a fully modular luggage system.

Backslide

As well as providing added comfort when worn on the back, the Backslide allows smaller bags and packs to be transported hands free by sliding over the telescopic handles found on larger, rolling styles.

Zoom

SnoKart Zoom bags extend to increase size and volume for versatility and convenience. Hardware bags extend in length allow for various sizes of equipment and our travel collection allows for bags to be resized around airline restrictions or the amount of kit required.

Carry-On

Carry-On compatible bags can fit into most aircraft overhead lockers to save the added time and costs to check in.

Please check individual airline restrictions.

Roller

SnoKart Rollers take the strain off your journey by allowing bags to be wheeled instead of carried. All SnoKart wheel sets are durable and smooth-rolling for an easy ride.

Extra Large Wheels

Large, smooth-rolling polyurethane wheels raise the bag further off the ground than standard wheel sizes. This allows products to easily cope with snow and rough terrain, perfect for ski resorts.

All-Terrain Wheels

Easy-glide, polyurethane wheels with an all-terrain tread. Adding grip when needed in snow and rough terrain, but offering a smooth ride through the smooth surfaces of airport lounges.

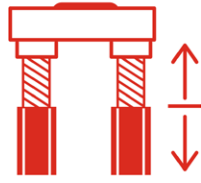

Padded Construction

The outer, PFC shell fabric is supported with a padded water-resistant lining to protect contents in transport or storage.

Water Resistant

Bags are constructed from a PFC Free, durable Polyester fabric which is designed to be waterproof, strong and lightweight.

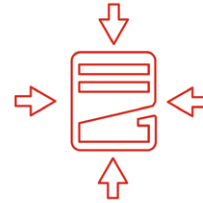

2 Stage Handle

A 2-stage, telescopic, anodised aluminium handle which is strong and lightweight. The two stages allow the handle to be used at two lengths and can be stowed away in a storage pocket for protection when not in use.

Backpack

Our backpack harnesses are ergonomically designed for optimum comfort. They are padded and reinforced to make carrying heavy loads easier and come with an adjustable chest clip for extra security.

G-Clip

G-Clip compression straps to securely lock contents in place whilst allowing the attachment of other compatible bags and accessories. Our G-Clips are engineered to lock onto the webbing but release simply by lifting the back of clip, allowing for smooth adjustment. All our webbing straps are finished to allow a G-Clip attachment.

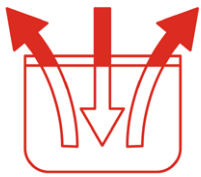

Fixing Points

Webbing fixing straps which are finished to allow the attachment of SnoKart G-Clips. Webbing daisy chains are sewn with a slight raise for seamless operation when attaching or removing G-Clips.

Goggle Pocket

An anti-scratch, soft lined pocket to store goggles, sunglasses or other valuable items. Keeping them secure and protect the lenses from damage.

Easy Access Pocket

Zipped easy access pockets are found on the exterior of SnoKart bags to allow easy retrieval of travel documents or essential items, without having to open the main bag.

Internal Dividers

SnoKart bags with internal dividers provide better protection for your equipment. Hardware bags include dividers to protect ski and snowboard hardware from damage and equipment bags use them to provide better organisation.

Mesh Organiser

Mesh Organisers provide easy organisation inside the bag. They usually consist of multiple sized mesh pockets which can be used to separate essential items or tech equipment.

Extra Space

SnoKart hardware bags which are sized to allow added space for clothing and other equipment. This protects the ski equipment further and allows for optimum use of airline baggage restrictions.

Tech Sleeve

A padded, soft-lined tech sleeve to fully protect laptops and tablets up to 15"

Utility Pocket

Often found in our hardware bags, mesh utility pockets allow for essential tools and accessories to be transported with hardware, whilst keeping them separate and preventing any damage.

Padded Grab Handles

Our grab handles are ergonomically designed and are placed to allow bags to be lifted comfortably. They are padded and reinforced to make carrying bulky, heavy loads easier.

Padded Shoulder Strap

Adjustable shoulder straps are padded for improved comfort. When not in use they are either removable or can be stowed away in designated storage pockets.

Lockable Zips

SnoKart bags feature the highest quality YKK zips on all products. These are smooth in operation, durable and allow for a padlock to keep contents safe.

3 CORE MODULES 6 OPTIONS
1 Smart Solution

834052/020

MODULAR INNOVATION KART 6

3 core components. 6 combinations.
1 smart luggage solution.

FEATURES

- The Kart 6 combines three of the best SnoKart products; The Kart Zoom Roller, Kargo 60 Roller & Kargo 40 Case.
- Flexible options for checking in. Take advantage of airline restrictions with six different combinations
- Constructed to the highest standards with PFC free fabric, which is waterproof, strong & lightweight
- Designed to carry heavy loads with padded construction and a durable, water-resistant lining
- Patented Fidlock magnetic connections provide quick and secure fixings and are supported by Black anodised G-Clips for added strength and stability
- Padded handle and strap construction that is both strong and comfortable
- Lockable zips, address window and ID card
- Smooth-rolling wheels large enough to cope with snow and rough terrain
- Webbing fixing points to allow the attachment of compatible SnoKart bags and accessories

SINGLE SKI CARRY

Ski Zoom

The perfect ski carrier to minimise weight and bulk at check-in whilst providing outstanding protection to ski equipment. The double zoom length adjustment allows the Ski Zoom to hold 98% of alpine skis.

FEATURES

- Starting at 160cm with an expanding double zoom which adjusts to fit skis up to 175cm then 190cm
- Stowaway shoulder straps maintain a clean look and prevent snags and damage when not in use
- Constructed to the highest standards with PFC free fabric, which is waterproof, strong & lightweight
- Designed to carry heavy loads with padded construction and a durable, water-resistant lining
- Padded handle and strap construction that is both strong and comfortable
- Lockable zips, address window and ID card
- G-Clip compression straps and webbing fixing points to allow the attachment of compatible SnoKart bags and accessories

The adjustable length equipment bag uses its double zoom feature to take skis from 160cm up to 175cm then 190cm, fitting 98% of alpine skis. It is spacious enough to hold one pair of skis with poles, leaving room for extra clothing and accessories.

834021/020

TWIN SKI ROLLER

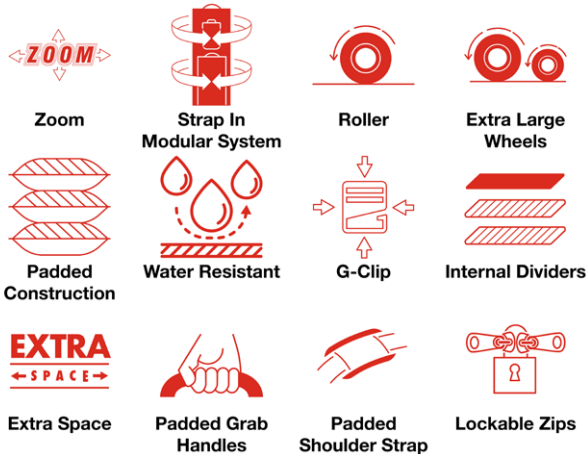

2 Ski Zoom Roller

The 2 Ski Zoom Roller is an adjustable length, rugged ski equipment bag which comfortably carries two pairs of skis, poles and accessories.

FEATURES

- Starting at 165cm with an expanding double zoom which adjusts to fit skis up to 185cm then 205cm
- Internal strap setup to secure skis in place with a padded divider to prevent damage
- Stowaway shoulder straps maintain a clean look and prevent snags and damage when in transit
- Constructed to the highest standards with PFC free fabric, which is waterproof, strong & lightweight
- Designed to carry heavy loads with padded construction and a durable, water-resistant lining
- Padded handle and strap construction that is both strong and comfortable
- Lockable zips, address window and ID card
- Smooth-rolling wheels large enough to cope with snow and rough terrain
- G-Clip compression straps and webbing fixing points to allow the attachment of compatible SnoKart bags and accessories

The 2 Ski Zoom Roller features large, smooth-rolling wheels, making it easy to manoeuvre over rough terrain and snowy areas. The side G-Clip compression straps keep any contents locked in place while allowing the attachment of other SnoKart bags and accessories.

Dimensions 165cm (extending to 206cm) x 27cm x 18cm

Weight 3.75kg

Use in conjunction with the SnoKart Airliner range to keep contents clean and protected.

The adjustable length equipment bag uses its double zoom feature to take skis from 165cm up to 185cm then 205cm. It is spacious enough to fit two pairs of skis with poles, leaving room for extra clothing and accessories.

834078/020

SHORTER HARDWARE BAG

Slopestyle Zoom Roller

A shorter length, deeper equipment roller bag for snowboards and shorter skis with extra space for boots, helmets and other accessories.

FEATURES

- Short, deep equipment bag with space for two snowboards with bindings, two sets of skis with poles and a combination of both
- Added deepness gives extra room for accessories and clothing
- Starting at 145cm with an expanding double zoom which adjusts to fit snowboards and skis up to 155cm then 165cm
- Internal strap setup to secure snowboards & skis in place with SnoKart's split padded divider to prevent damage
- Constructed to the highest standards with PFC free fabric, which is waterproof, strong & light-weight
- Designed to carry heavy loads with padded construction and a durable, water-resistant lining
- Padded handle and strap construction that is both strong and comfortable
- Lockable zips, address window and ID card
- Smooth-rolling wheels large enough to cope with snow and rough terrain
- G-Clip compression straps with webbing fixing points to allow the attachment of compatible SnoKart bags and accessories

SNOWBOARD PROTECTION

Neo Rap

The neoprene, ultra-lightweight snowboard rap protects edges and allows for hands-free transit around the slopes.

FEATURES

- Easy fitting - one Size fits most snowboards up to 158cm
- Reinforced nose and tail protection keep edges secure and prevents damage
- Constructed to the highest standards with neoprene fabric, which is strong & lightweight
- Robust and comfortable, padded, fold-away backpack construction with a storage pouch
- Zip-close mesh essentials pocket
- Compression straps lock snowboard firmly in place
- Nose grab handle for easy retrieval or storage loop

Created with the Snowdome in mind, The Neo Rap is perfect for the slopes, allowing hands-free, secure transit of most snowboards up to 158cm, quickly rolling up for easy storage in a backpack or locker.

It is constructed from a durable neoprene fabric which is robust and lightweight with reinforced nose and tail protection to keep edges secure and to prevent damage to both the board and its surroundings.

The Neo Rap features a packable, padded backpack harness with storage pocket, compression straps to keep snowboards secure and a mesh essentials pocket.

EASY SKI TRANSPORT

Ski Rap

The pocket-sized, ultra-lightweight Ski Rap allows for hands-free transit of multiple sets of skis around the slopes.

FEATURES

- Easy fitting - one Size fits all
- Constructed to the highest standards, strong & lightweight
- Robust and comfortable strap with padded shoulder pad
- Pocket-sized and ultra-lightweight for easy storage
- Hook & loop strap ties skis together securely

Created with families in mind, The Ski Rap is perfect for the slopes, allowing hands-free, secure transit of all skis, quickly rolling up for easy storage in a pocket or backpack. Ideal for children to develop independence.

Constructed from a durable fabric which is robust and lightweight, The Ski Rap is comfortable, with padded shoulder support, allowing the carry of multiple sets of skis at once—a convenient and straightforward SnoKart product.

834043/020

MODULAR BOOT TRANSPORT

Boot & Helmet Pack

A smart but straightforward backpack for boots, helmet & accessories or two pairs of ski and snowboard boots.

FEATURES

- Main boot compartment with a separate top area for a second pair of boots or a helmet and accessories
- Padded double back for extra comfort and the ability to stack over telescopic handles for easy transit
- Constructed to the highest standards with PFC free fabric, which is waterproof, strong & lightweight
- Padded handle and backpack construction that is both strong and comfortable
- An internal stash pocket for small accessories, tools and documents.
- Lockable zips, address window and ID card
- Air vents allow boots to breathe, preventing odour

The Boot & Helmet Pack is a versatile boot bag which can be used to transport two pairs of ski and snowboard boots or a single pair with a helmet and room for accessories using a flexible internal divider.

The Boot & Helmet pack features a padded backpack harness with chest strap and a double back for added comfort and the ability to stack onto telescopic handles for simple transit. Perfect for two people travelling together with boots and able to be used in resort with 40l of storage space.

SIMPLE BOOT BAG

Classik Boot Bag

Made to the same standards as our larger bags, this padded boot bag offers the best protection for ski and snowboard boots with room for accessories.

FEATURES

- Main boot compartment with room for accessories
- Constructed to the highest standards with PFC free fabric, which is waterproof, strong & lightweight
- Padded handle and strap construction that is both strong and comfortable
- Easy-access external pockets for small accessories, tools and documents.
- Lockable zips, address window and ID card
- Air vents allow boots to breathe, preventing odour
- Fold down base for easy storage

The Classik Boot Bag comfortably fits in one pair of ski and snowboard boots with room for accessories and multiple easy-access, external pockets can be used to store essentials and documents.

The Classik Boot Bag features a removable, padded shoulder strap which can be stored in the external, easy-access pockets when not in use and the fold away base allows the bag to fold neatly when empty.

YEAR-ROUND TRAVEL

Split Roller

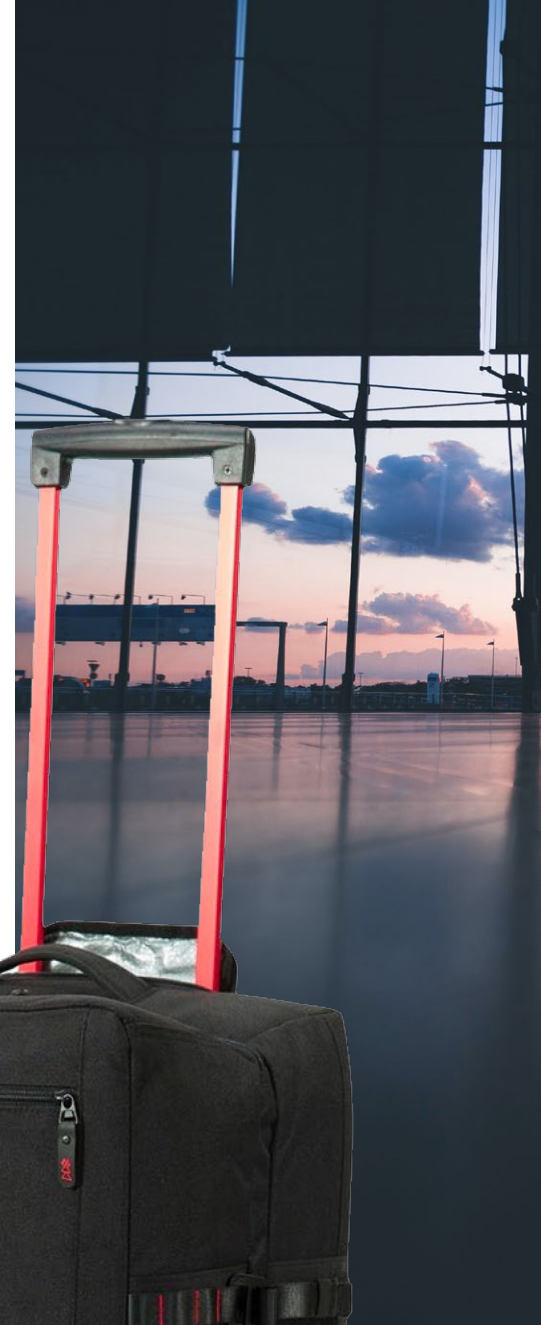

A practical Snowsport inspired split level roller bag that can be used year-round for any destination and integrates seamlessly with other SnoKart bags and accessories.

FEATURES

- 90l easy access storage split over two compartments which open flat for packing and organisation
- 2-stage, telescopic, anodised aluminium handle with a storage pocket and easy-glide wheels
- Constructed to the highest standards with PFC fabric, which is waterproof, strong & lightweight
- Multiple padded handles that are both strong and comfortable for easy handling and manoeuvring
- External easy-access anti-scratch lined pocket
- G-Clip compression straps with webbing fixing points to allow the attachment of compatible SnoKart bags and accessories
- Lockable zips, address window and ID card

Perfect for year-round travel, the Split Roller holds everything needed for any destination, business and pleasure, with internal mesh pockets securing 90l of room, split over two halves which open flat for easy packing and organisation.

The 2-stage telescopic aluminium handle and smooth-rolling wheels make it easy to manoeuvre and the side G-Clip compression straps keep any contents locked in place while allowing the attachment of other SnoKart bags and accessories.

LIGHTWEIGHT SKI SLEEVE

Ski Airliner Zoom

Part of SnoKart's range of Airliners, the Ski Airliner Zoom is lightweight and robust, protecting skis and keeping them separate from clothes in your main ski bag. It also makes the perfect protective cover for skis in storage and provides lightweight transit.

FEATURES

- Starting at 160cm with an expanding double zoom which adjusts to fit skis up to 175cm then 190cm
- Constructed to the highest standards with ripstop fabric, which is waterproof, strong & lightweight
- Padded grab handle and strap construction that is both strong and comfortable
- Handle and hanging loop at each end for easy retrieval and storage
- Large, easy-access opening with heavy-duty zips
- Address window and ID card

The adjustable length Airliner uses its double zoom feature to take skis from 160cm up to 175cm then 190cm, fitting 98% of alpine skis. Cut into a curved shape that minimises fabric and weight and maximises storage with room for poles.

Constructed from a ripstop fabric which is waterproof, robust and lightweight, The Ski Airliner protects skis in storage, transit and against other equipment within a larger equipment bag, preventing damage.

LIGHTWEIGHT SNOWBOARD SLEEVE

Board Airliner

Part of SnoKart's range of Airliners, the Board Airliner is lightweight and robust, protecting a snowboard and bindings, keeping them separate from clothes in your main ski bag. It also makes the perfect protective cover for a snowboard in storage and provides lightweight transit.

FEATURES

- Suitable for snowboards and bindings up to 170cm
- Constructed to the highest standards with ripstop fabric, which is waterproof, strong & lightweight
- Grab handle and strap construction that is both strong and comfortable
- Handle and hanging loop at each end for easy retrieval and storage
- Large, easy-access opening with heavy-duty zips
- Address window and ID card

The Board Airliner comfortably fits a snowboard with bindings, up to 170cm. Cut into a curved shape that minimises fabric and weight and maximises storage with room for bindings.

Constructed from a ripstop fabric which is waterproof, robust and lightweight, The Board Airliner protects a snowboard in storage, transit and against other equipment within a larger equipment bag, preventing damage.

LIGHTWEIGHT BOOT BAGS

Boot Airliners

Part of SnoKart's range of Airliners, the Boot Airliners are a pair of lightweight and robust boot bags that protect ski or snowboard boots, keeping them separate from clothes in your main equipment bag. Connected, they make the perfect protective cover for ski or snowboard boots in storage and provide lightweight transit.

FEATURES

- Suitable for most sizes and styles of ski and snowboard boots
- Constructed to the highest standards with ripstop fabric, which is waterproof, strong & lightweight
- Press-stud and hook & loop join-up option enables both bags to be carried together like a standard boot bag
- Grab handles and storage hooks for easy retrieval and storage
- Large, easy-access openings with heavy-duty zips

The Boot Airliners comfortably fit one ski or snowboard boot each, cut into a curved shape that minimises fabric and weight and maximises storage room. They can be packed individually within a larger equipment bag or connected using press-stud and hook & loop fixings to be used and carried as one connected bag.

Constructed from a ripstop fabric which is waterproof, robust and lightweight, The Boot Airliners protect ski and snowboard boots in storage, transit and against other equipment within a larger hardware bag, preventing damage.

Water Resistant

Dimensions 36cm x 33cm x 14cm each (28cm combined)

Weight 150g each (300g combined)

Carry-on Compatible Fits into many aircraft overhead lockers*

LIGHTWEIGHT HELMET PROTECTION

Helmet Airliner

Part of SnoKart's range of Airliners, the Helmet Airliner is lightweight and robust, protecting a helmet, keeping it separate in your main equipment bag. It also makes the perfect protective cover for a helmet in storage and provides lightweight transit.

FEATURES

- Suitable for most standard helmets*
- Constructed to the highest standards with ripstop fabric, which is waterproof, strong & lightweight
- Large, easy-access opening with draw-cord
- Draw-cord can be used to carry the helmet comfortably
- Soft, anti-scratch lining keeps helmet protected

With more helmets being sold without a bag, The Helmet Airliner is the best way to protect your investment. Its generous space fits most ski and snowboard helmets* and anti-scratch lining protects from damage during transit.

Constructed from a ripstop fabric which is waterproof, robust and lightweight, The Helmet Airliner protects a ski or snowboard helmet in storage, transit and against other equipment within a larger equipment bag, preventing damage.

*Fits most standard helmets up to a XL. Some styles and Visor helmets may vary.

INNOVATIVE PACKING SOLUTION

Airliner Packing Cubes

Part of SnoKart's range of Airliners, the Airliner Packing cubes are lightweight and robust, keeping contents clean and organised. Packing cubes have revolutionised travel, and the concept is easy and beneficial.

FEATURES

- 3-sizes to fit most common clothing and accessories
- 5l, 8l & 12l
- Constructed to the highest standards with ripstop fabric, which is waterproof, strong & lightweight
- Clear front panel to quickly check contents
- Sized to fit perfectly as a single later inside SnoKart roller bags
- Machine washable

Keep luggage contents clean, organised and crease-free; the revolutionary packing cube concept has changed packing. Items can be organised into individual packs, reducing the volume, increasing available space and speeding packing time.

The SnoKart Airliner Packing Cubes are a genuine innovation that makes travelling easier; they offer versatile packing solutions and fold and pack down, so can be stored away effortlessly.
