

# workbook hardgoods collection 22.23

# pursuit of pleasure

blackcrows propagates a sensory exploration of the **joy of life**.

blackcrows pursues a heightened **sensory journey** into ski culture and the constant pursuit of pleasure, from physical sensation to state of mind, on and off the mountain, all year round.

blackcrows is an **expression of self** and an exploration of hedonistic **satisfaction** - this is how we embrace our community.

Today blackcrows is strengthening and diversifying its community in every sense of the word and we want to preserve the unique **authenticity** of this brand as we build our way towards a more **sustainable** society and a world we want to be **responsible**.

# hardgoods

"The phoenix is a crow.  
Every year we start again, and yet  
every winter seems like the dawn  
of a new life. Or let's say a new,  
exciting adventure. And its twilight.

**This is the story of a new season  
of blackcrows skis, designed and  
tested in Chamonix.**

If you are reading these lines, you  
know. Because every skier knows,  
a winter is a life, a life of play without  
video, of unlimited credits if you  
go for them, a life of surprises and  
expectations, and a life of pleasure  
when a day or even just a ski turn,  
becomes: magic.

Our collection of ski equipment is  
like this, with imponderables, with  
the unavoidable, with things that are  
found like mountains, serene in their  
immutability, and new stories that  
come to hang on them, like clouds,  
like storms, for joy.

**Blackcrows free skiing is articulated  
around 4 categories: Big Mountain,  
All-Terrain, Piste and Touring.**

This line of conduct guides our  
skiing and imposes 4 invariable  
criteria on our ranges: all terrain,  
all snow, ease, efficiency.

For this new season, new  
products are arriving in almost  
all our segments.

In the **all mountain** category,  
the update of the captis (and its  
female counterpart the captis birdie)  
crowns six years in the range for  
this accessible ski, easy to steer  
and able to adopt all styles. A new  
version that is both more incisive  
and more playful, more grippy  
and still as sensual, to enjoy  
winter in all conditions.

In **big mountain**, the atris, iconic  
and unavoidable model of the  
freeride ski à la blackcrows  
and its feminine counterpart atris  
birdie both get a face lift. This  
is the third version of this very  
popular, high-performance wide  
ski, which appeared in the range  
in 2014 and plays its part in the  
same tone as the anima,

but thinner and more manageable  
for all types of snow.

In the **piste** range, the orb returns  
with two new small sizes, for this  
popular, lively and accessible ski, with  
a long radius, progressive front rocker  
and early rise. It remains surrounded  
by the mirus cor and serpo which  
arrived last season and which have  
already proved their worth, at least  
in the open resorts of Europe and  
especially the Americas.

Among **the hikers**, the camox freebird  
and ova freebird are filling up. Our most  
playful and tolerant "95 on skate"  
is becoming less stiff underfoot,  
with a balanced twist and a serene  
spirit, ready for anything. The ova  
freebird, the rando counterpart of the  
vertis, has been updated to make it  
more dynamic, with a new core that  
makes it more aggressive without  
losing popularity.

So enjoy the flight, the skiing  
adventure is ahead of you.

# big mountain

Our best pairings for skiing the big and beautiful slope, like Greek gods of the summits, surrounded by white, rocks, mocking and benevolent birds, and the silence that befits concentration. In wanting to ski beautiful lines, to jump sometimes big bars, to live a vertical and wild life, we sometimes forget the sense of reality. Or is it enough to invent one to transcend it?

Our collection of wide, often playful and powerful skis is aimed at skiers in search of unique sensations and space. Some models are more specific to big powder and some to firmer snow, but all are there to fly over and sublimate the elements with the skier. Blackcrows skiing in the broadest sense.

# new: atris et atris birdie

This is the third edition of this iconic blackcrows ski that first appeared in 2014. For this new 2022 version, here it is very slightly refined, to gain even more accessibility and versatility. It is truly the everyday big mountain ski, for skiers who like it when it excels in powder but who want impeccable behaviour in all conditions. The vocals have been revised and will distinguish it from its predecessors for the discerning eye, but the essential is inside, for a ski that achieves its objectives and delights the heart of the most demanding.

big mountain

# nocta

unsinkable  
light  
the beast

## description:

Floating associated with maneuverability, the nocta is the ultimate toy for big conditions. The combination of high lift, reverse camber and tight rib lines allow the nocta to combine natural ease in powder, good edge stability and great maneuverability. Amazing in more ways than one. Do you like to surf? Then it's the nocta.

## the nitty-gritty:

**high floatation:** 122mm at the waist

**reverse camber:** easy to pivot and curves in carving

**straight sidecut:** long curve radius, high speed stability

**flex:** intermediate throughout the length of the ski, performance and forgiveness

**mounting point:** -6cm

**drilling:** diameter 3.5mm x L 9mm

style code: 101360

## technical specifications:

**construction:** semi-cap

ABS sidewalls all around

**core:** paulownia-poplar-paulownia / fiberglass

**177.6**

**tip:** 13.9 cm

**waist:** 12.2 cm

**tail:** 13.2 cm

**radius:** 21 m

**tail:** 13.4 cm

**radius:** 21 m

**weight:** 4150g/pair

stop making banana bread

## big mountain

# anima

eager  
animated  
animal

style code: 101361

### description:

The anima is a big mountain ski that combines power and maneuverability. It is a machine that easily enters curves, is very playful, performs well on hard snow for its size and is very stable at high speeds. The Anima is a ski that embraces the creativity of the skier (big lines, jumps, quick pivots, switch) and always keeps you on your toes. It's an animal and it's the ski of the Freeride World Champion Kristofer Turdell.

### the nitty-gritty:

**high floatation:** 115mm at the waist

**double rocker:** great maneuverability, control, pivot

**classic short camber:** classic camber underfoot with short ski/snow contact, more maneuverability

**long sidecut:** long curve radius, high speed stability, good grip

**progressive and consistent tip floatation:**

easy to get off the ground

**very progressive flex in the tip and tail, but firmer at the ski/snow contact points:**

good deformation in soft snow

and efficient on hard snow

**mounting point:** -6cm

**drilling:** diameter 3.5mm x L 9mm

### technical specifications:

**construction:** semi-cap

ABS sidewalls all around

**core:** poplar / fiberglass

**added material:** carbon / kevlar tape

**176.6**

# CORVUS

vivid  
powerful  
alpine

## description:

A historical model of blackcrows, the corvus remains the guardian of the temple with its alpine soul associated with a reverse camber. Intended for the purest freeride, the corvus version 2022 combines a very good pivot thanks to its original profile and a very strong grip on hard terrain thanks to the flat portion under the foot and its double titanal plate. The ski is both powerful and well anchored to the ground. Warrior by nature, it enjoys this balance of forces for ultimate confidence on all types of terrain.

## the nitty-gritty:

**good floatation:** 107mm at the waist  
**reverse camber and flat surface in the middle of the ski:** lots of pivot and very powerful grip  
**double titanal plate:** stability and precision  
**21 meter radius:** attacking soul  
**solid flex under the foot then progressive in the tip and tail:** comfort and efficiency  
**mounting point:** -8cm  
**drilling:** diameter 4.1mm x L 9mm

style code: 101363

## technical specifications:

**construction:** semi-cap  
ABS sidewalls all around  
**core:** poplar / fiberglass  
**added material:** double titanal plate

**176.1**

**tip:** 13.4 cm  
**waist:** 10.7 cm  
**tail:** 12.5 cm  
**radius:** 21 m  
**weight:** 3700g/pair

**189.2**

**tip:** 13.8 cm  
**waist:** 10.7 cm  
**tail:** 12.7 cm

# solis

vertical  
exclusive  
technique

## description:

The ski dedicated to the demands of steep slopes. The result of long development in the field, the solis combines a homogeneous flex throughout the ski, a fairly firm tip and tail and a long radius in the tip lift. This combination provides an exclusive pivot, avoids oversteering in steep passages and provides a secure heel when the pack is heavily loaded. The solis also benefits from a reinforced edge and a very good grip thanks to a titanal plate under the foot. Voluntarily ultra specific, the solis is the ski for verticality lovers.

## the nitty-gritty:

**good floatation:** 100mm at the waist  
**progressive and simple front rocker:** to avoid oversteering

**long radius:** very good grip on hard snow and specific to steep skiing

**progressive tail and light rear rocker:** secures the rear supports and facilitates the setting in pivot

**classic light camber:** balance between stability and maneuverability

**long and homogeneous flex:** to avoid oversteering

**mounting point:** -9 cm

**drilling:** diameter 4.1mm x L 9mm

style code: 101364

## technical specifications:

**construction:** semi-cap

ABS sidewalls all around

**core:** paulownia / poplar

**added material:** titanal plate under the binding;  
glass/carbon fiber

**feature:** minimalist seal skin attachment at the front

**173.3**

i'm really hard

# mountain touring

**Climb higher, descend harder, caress the snow or rough it, our most lightly efficient touring gear, with an airy, aristocratic spirit that doesn't scorn sweat. These are the freebird blackcrows, designed for the great space of freedom that is skiing in the mountains on your own.**

Skiing the mountain in all lightness, in all confidence, but above all with the mindset that our touring skis are designed to ski beautifully, even in the sometimes nasty snow. Climbing is just a path, tracking is not an option and skiing for adventure and freedom is what drives us.

# new: camox freebird

This unbeatable all-terrain mid-fat is known for its forgiveness and playfulness. Its progressive flex makes it a great ski for progression, supporting its freestyle-derived playful DNA. Its long effective edge gives it good stability and a big grip at high speed. Creativity for all on all types of terrain.

# new: ova freebird

After 9 years in the range and for its third update, the ova freebird has been largely revamped. It is a ski with a noticeably sportier flex, very lively, but still very accessible and easy-going. The objective of lightness does not impose any constraints on its downhill behaviour, which must be comfortable and exemplary, and its new core makes it a beautiful beast of power, which gains in aggressiveness without losing in popularity.

touring

# ferox freebird

surfy  
aggressive  
light

## description:

The Ferox Freebird was born out of the need to offer a double-rockered, powder-oriented touring ski that remains efficient on the edge.

The objective is therefore powder and the sensation of floating on natural snow, but the soul remains alpine to adapt to all conditions encountered in touring. With a twin-tip and a double rocker, it is a ski that offers a very good feeling in powder with its immediate lift and pivot, but which keeps a good base on hard snow thanks to its progressive sidecut.

## the nitty-gritty:

**high floatation:** 107mm at the waist

**double rocker:** immediate pivot

**classic medium camber:** classic camber under the foot with intermediate ski/snow contact for a perfect balance between stability and handling

**long sidecut:** long curve radius (21m), high speed stability

**progressive flex:** comfortable and forgiving

**mounting point:** -8cm

**drilling:** diameter 3.5mm x L 9mm

style code: 101655

## technical specifications:

**construction:** semi-cap and cap in tip area for weight saving, lightness and handling  
ABS sidewalls except on tip

**lightweight core:** paulownia - isocore - poplar / fiberglass

**added material:** 3D carbon construction designed in an H shape, hollowed out in the middle to save weight + 2 poplar stripes under the bindings for reinforcement

# corvus freebird

light  
big heart  
powerful

## description:

The choice of the true wide touring skiers, the corvus freebird benefits from a slight rocker rise in the tip, a dynamic tail and long sidecut.

The result is an aggressive and very precise ride on the entry and exit of the curve for a ski full of tone. It is also equipped with a titanium plate under the foot to adapt to the new hybrid bindings. Life is always in the pink.

## the nitty-gritty:

**good floatation:** 109mm at the waist  
**progressive front rocker and slightly contoured**

**sidecut:** great stability in carving

**classic long camber:** classic camber under the foot with extended ski/snow contact for alpine style cornering

**progressive tail:** secures support and facilitates pivoting

**titanal plate under the foot adapted to the new hybrid bindings**

**mounting points:** -10cm

**drilling: diameter** 4.1mm x L 9mm

style code: 101656

## technical specifications:

# orb freebird

light  
robust  
genuine

## description:

Dressed in its famous one-piece fluorescent yellow, the orb freebird is a reference in ski touring. Designed with a fine and progressive rocker lift that gives it a strong base and a very secure grip, it is the perfect companion for vertical odysseys. Cut for the mountain with a 90mm waist width, light and with a very good skiability, it is the accomplice of all the adventures, including the most radical. For the smaller riders, a new small size (155cm) is here this year.

## the nitty-gritty:

**intermediate floatation:** 90mm at the waist

**front rocker:** pivot and floatation

**classic camber:** balance between stability and manoeuvrability

**intermediate flex along the entire length**

**of the ski:** performance and forgiveness

**titanal plate under the foot to adapt**

**to the new hybrid bindings**

**mounting point:** -10 cm

# new ova freebird

light  
robust  
genuine

## description:

After nine years in the range and on its third update, the ova freebird has been largely revamped again. It is a ski with a noticeably sportier flex, very lively, but still very accessible and easy-going. The objective of lightness does not impose any constraints on its downhill behaviour, which must be comfortable and exemplary, and its new core makes it a beautiful beast of power, which gains in aggressiveness without losing its popularity.

## the nitty-gritty:

**intermediate floatation:** 85mm at the waist

**front rocker:** pivot and floatation

**classic camber:** balance between stability and manoeuvrability

**titanal reinforcement under the bindings:** reinforcement of the binding assembly

**intermediate flex along the entire length of the ski:** performance and forgiveness

**mounting point:** -10 cm

**drilling:** diameter 4.1mm x L 9mm

style code: 101616

## technical specifications:

# mentis freebird

ultra light  
efficient  
skier

style code: 101371

## description:

A ski born from the desire to develop a thin, high-performance and very light machine, but with the aim of achieving very high skiability for this type of range. A width of 80mm gives it comfort and assurance, while maintaining a light weight. The mentis is all about technology for great comfort in soft snow and precise handling in rough terrain. When you're on top very quickly, you can look down with delight. The possibilities of the mentis know no bounds.

## the nitty-gritty:

**small floatation:** 80mm at the waist

**front rocker:** pivot and floatation

**classic long camber:** classic camber under the foot with extended ski/snow contact for alpine style cornering

**titanal reinforcement under the bindings:** reinforcement of the binding assembly

**intermediate flex along the entire length of the ski:** performance and forgiveness

**mounting point:** -9.5 cm

**drilling:** diameter 4.1mm x L 9mm

## technical specifications:

**construction:** semi-cap and cap in tip area for weight savings, lightness and handling  
ABS sidewalls except on tip

**core:** paulownia

**added materials:** titanal reinforcement under the bindings; mixed glass/carbon fibers

**157.1**

# pilus

The pilus skin has the particularity of having a thin membrane that protects and seals the glue. Strong and durable, very practical and unaffected by temperature variations, the pilus is the ideal partner to climb serenely towards bliss. The super light membrane is light, very resistant and 100% waterproof. Hybrid composition (mohair / nylon) for an excellent ratio of hold when climbing and glide when descending.

# pilus super light

## description:

The pilus skin has the particularity of having a thin membrane that protects and seals the glue. Strong and durable, very practical and unaffected by temperature variations, the pilus is the ideal partner to climb serenely towards bliss. The super light membrane is light, very resistant and 100% waterproof. Hybrid composition (mohair / nylon) for an excellent ratio of grip when climbing and glide when descending.

Water repellent material (fluorine free): reduction of chemical components which does not alter performance but reduces the ecological impact.

## the nitty-gritty:

**plush material:** 70% mohair, 30% nylon  
**hydrophobic treatment without PFC**  
**super light membrane**  
**effective and durable glue**

## pre-cut model sizes:

101261 **ferox freebird** (170/176/181/186)  
 101262 **corvus freebird** (176/183/188)

to me there is nothing better than feeling smoother than a dolphin

# all terrain

**Skiing in all types of snow, not being content with a single state of the snowflake, taking advantage of the conditions as they come. This All Terrain collection is for the most versatile of skiers.**

Because a day in the mountains is not limited to one activity, our All Terrain collection is polymorphous, always fun, above all effective, and never monotonous. Colours and shapes specific to blackcrows, for skiers who do not neglect sensations, nor a certain appetite for curves on all surfaces and no longer for movements, aerial for some. Technical, playful, skis for all conditions, but not just any sauce.

# new: captis et captis birdie

This is a brand new version of the popular blackcrows ski, accessible and more sensual than consensual. Its freestyle heritage and reasonable but consistent width make it an all-terrain ski that holds its edge well for carvers, and is easy to steer to suit all styles. This new version is more incisive but also more playful, with a ski that is more grippy but still easy to handle, a pleasure to enjoy all winter in all conditions.

all terrain

# justis

homogeneous  
incisive  
wild

## description:

An all-terrain ski designed for the wildest curves, the justis has enough width to charge over crud, a double titanal plate for a committed ride and a good dose of rocker for supple steering. A ski for those who are primarily in the ski area and who want a machine with a lot of power to take them further.

## the nitty-gritty:

**good floatation:** 100mm at the waist

**progressive rocker in the front  
and light rocker in the back:**

pivot control, manoeuvrability, floatation  
**classic camber:** balance between stability  
and handling

**radius:** 21 meters for an attacking soul

**flex:** energetic with double titanal H-plates  
for a better response

**mounting point:** -8 cm

**drilling:** diameter 4.1mm x L 9mm

style code: 101356

## technical specifications:

**construction:** semi-cap  
ABS sidewalls all around

**core:** poplar / fiberglass

**added material:** double titanal H-plate  
and aluminium tail insert

# serpo

carver  
stable  
serene

## description:

The Serpo is a young and lively ski in the range for curving on the piste and poking a bit off-piste. With 93mm at the base, it is a good carver, it is there to really play with the terrain with its tolerant flex but it also has positive response thanks to its metal layer for grip and stability. For all that, its performance does not erase the ease and pleasure of the game.

## the nitty-gritty:

**intermediate floatation:** 93mm at the waist  
**progressive front rocker and light rear rocker:** pivot control, manoeuvrability, floatation

**classic camber:** balance between stability and handling

**radius:** 20 meters for an attacking soul

**flex:** energetic with double titanal plate underfoot for a better response

**mounting point:** -8 cm

**drilling:** diameter 4.1mm x L 9mm

# resort

The beauty of the gesture and the precision of the curve are not the prerogative of the powder. Blackcrows also anchors its roots as well as its turns in this space of the freshly groomed, graphic and mechanised slope.

Our Resort collection is aimed at grooming aesthetes, lovers of carved curves and hedonistic travellers from one end of the great ski areas to the other. Precise skis for the search for performance on perfect slopes and snow stadiums, or more accessible skis to enjoy the landscapes with no ulterior motives other than sliding on the snow. A rare and simple pleasure, which is intensely shared, even when you are alone.

# mirus cor

angular  
versatile  
innovative

## description:

The Mirus Cor is a ski object born of performance and design, to achieve an alliance between two worlds: freestyle and the most angular carves of the moment. Built with a long rocker tip and tail, it can be skied short to play with piste and the side stashes of the piste. It is carving in a blackcrows approach and freestyle all terrain. Accessible, solid and creative in every sense.

## COR

The Cor blackcrows acronym is found on products that seek to disrupt the practice and innovate to push the creativity on the ground. And on all terrains.

## the nitty-gritty:

**intermediate floatation:** 87mm at the waist

**very short radius (13m):** super reactivity

**double rocker with fish tail:**

great handling, control, pivot

**classic medium camber:** classic camber under the foot with intermediate ski/snow contact:

balance between stability and handling

**mono titanal plate in the middle of the ski:**

bounce and tone, but also weight savings

**energetic flex with a very good grip all along**

**the ski:** high performance ski but very playful

**mounting point:** -3.5 cm

**drilling:** diameter 4.1mm x L 9mm

style code: 101355

## technical specifications:

**construction:** semi cap

ABS sidewalls all around

**core:** poplar / fiberglass

**material:** titanal single plate

# orb

**energetic  
metallic  
fast**

## description:

The orb has been successful because of its liveliness and accessibility and it is back with the two new smaller sizes added last season. This version of the orb has a longer radius, a progressive front rocker and an early rise. An energetic ski with rebound that likes to go fast, these assets give the ski a strong grip thanks to its edge length and good behaviour in soft snow with its progressive flex. Its H shaped double titanal plate gives the Orb its own unique base. The plate concentrates the energy of the titanal on the edges and allows the ski to be airy while remaining well grounded. A beast of the piste and edge of the piste.

## the nitty-gritty:

**intermediate floatation:** 88mm at the waist  
Front rocker: pivot and floatation

**classic long camber:** classic camber under the foot with extended ski/snow contact for alpine style turn handling

**double titanal H shape plate along the ski:**

bounce and tone, but also weight savings

**energetic flex with very good grip along**

**the entire length:** a high-performance

yet manoeuvrable ski

Early-rise tail rocker

**mounting point:** -10 cm

**drilling:** diameter 4.1mm x L 9mm

**style code:** 101352

## technical specifications:

**construction:** semi-cap

ABS sidewalls all around

**core:** poplar / fiberglass

**added material:** double titanal H-plate + aluminium tail insert

# vertis

biting  
accurate  
agile

## description:

Dynamic and playful, the Vertis is a short radius ski (15 metres) designed for vitality. With its 85mm width underfoot, it benefits from very fast edge-to-edge transition which accentuates the pleasure of carving. Both accessible and powerful thanks to its intermediate flex, the Vertis is the ultimate blackcrows piste ski.

## the nitty-gritty:

**small floatation:** 85mm at the waist

**light rocker:** stability, small pivot, good edge grip, floatation off

**classic long camber:** classic camber under the foot with extended ski/snow contact for alpine style cornering

**short radius (15m) and narrow waist (85mm):** reactivity, speed of transition from edge to edge, short cut driving, sporty and playful flex, front rocker & early-rise tail

**mounting point:** -8cm

**drilling:** diameter 3.5mm x L 9mm

**style code:** 101354

## technical specifications:

**construction:** semi-cap

ABS sidewalls all around

# divus

sharp  
fine  
incisive

style code: 101353

## description:

Designed for ski areas with a penchant for smooth surfaces that call for trajectory, the Divus has the same technical characteristics as the orb, but with a narrower width (82 mm), a shorter radius (17 metres) and a slightly reduced rocker for a dynamic and smooth ride. As with the orb, the base of the ski is reinforced by a H shaped double titanal plate which concentrates the energy of the titanal and allows the ski to be energetic while being well placed on the ground. Hot in front, hot!

## the nitty-gritty:

**small floatation:** 82mm at the waist

**light rocker:** stability, small pivot, good edge grip, floatation off

**classic long camber:** classic camber under the foot with extended ski/snow contact for alpine style cornering

**short radius (17m) and narrow waist (82mm):** reactivity, speed of transition from edge to edge

**energetic flex with very good grip**

**along its entire length:** a high-performance yet manoeuvrable ski

**mounting point:** -9 cm

**drilling:** diameter 4.1mm x L 9mm

## technical specifications:

**construction:** semi-cap

ABS sidewalls all around

**core:** poplar / fiberglass

**added material:** double titanal H-plate + aluminium tail insert

Same shape, same intention, same  
definition, same purpose: skiing.

birdie

# anima birdie

eager  
animated  
animal

style code: 101366

## description:

Beyond its shimmering colours, the anima birdie is a ski dedicated to big mountain skiing that combines confidence and maneuverability. It is very playful, performs well on hard snow for its size, and is very stable at high speeds. The anima follows the creativity of the skier and always stays under her foot. Let it go!

## the nitty-gritty:

**high floatation:** 115mm at the waist

**double rocker:** great maneuverability, control, pivot  
**classic short camber:** classic camber underfoot with short ski/snow contact, more maneuverability

**long sidecut:** long curve radius, high speed stability, good grip

**progressive and consistent tip floatation:**

easy to get off the ground

**very progressive flex in the tip and tail, but firmer at the ski/snow contact points:**

good deformation in soft snow and efficient on hard snow

**mounting point:** -6cm

**drilling:** diameter 3.5mm x L 9mm

## technical specifications:

# new atris birdie

versatile  
charmer  
charger

## description:

This is the third edition of this iconic blackcrows ski that first appeared in 2014. For this new 2022 version, it is slightly refined, to gain even more accessibility and versatility. It is truly the everyday big mountain ski, for women skiers who like it when it excels in powder but who want impeccable behaviour in all conditions. The lines have been revised and will distinguish it from its ancestors for the discerning eye, but the essential is inside, for a ski that achieves its objectives and delights the heart of the most demanding.

## the nitty-gritty:

**good floatation:** 105mm at the waist

**double rocker:** great maneuverability, control, pivot

**classic medium camber:** classic camber underfoot with intermediate ski/snow contact, balance between stability and handling

**slightly straight sidecut (20m radius):** more stability at high speed, better balance between firmness and manoeuvrability

**progressive tip floatation:** great consistency in turns, easy to get off the ground

**firm and constant flex:** very stable ski

**mounting point:** -8 cm

**drilling:** diameter 3.5mm x L 9mm

style code: 101613

## technical specifications:

**construction:** semi-cap

ABS sidewalls all around

**core:** poplar / fiberglass

## description:

This unbeatable all-terrain toy is known for its forgiveness and playfulness. The combination of a very progressive flex and a long effective edge provides great manoeuvrability and grip at high speeds. With a freestyle-derived DNA, the progressive, softened flex makes it easy to progress, while the extended sidecut and long effective edge provide plenty of stability. Creativity for all on all types of terrain.

## the nitty-gritty:

**intermediate floatation:** 97mm at the waist

**double rocker:** great handling, control, pivot

**slightly straight sidecut (20m radius):**

stability at high speed, balance between firmness and maneuverability

**classic medium camber:** classic camber underfoot with intermediate ski/snow contact, balance between stability and maneuverability

**progressive flex:** comfortable and forgiving

**mounting point:** -6 cm

**drilling:** diameter 3.5mm x L 9mm

style code: 101367

## technical specifications:

**construction:** semi-cap step-down

ABS sidewalls all around

**core:** poplar / fiberglass

birdie

# vertis birdie

biting  
accurate  
agile

## description:

With a lighter core and a softer flex than its universal avatar, the vertis birdie is the preferred choice for women skiers who want an accessible, high performance, on-piste machine. With its short radius (15 metres) and 85mm at the base, it benefits from a very fast edge-to-edge transition that makes it a pleasure to ride. With three intermediate sizes (152, 159, 169), the vertis birdie is our women's piste ski par excellence.

## the nitty-gritty:

**small floatation:** 85mm at the waist

**light rocker:** stability, small pivot,  
good edge grip, floatation off

**classic long camber:** classic camber under  
the foot with extended ski/snow contact  
for alpine style cornering

**short radius (15m) and narrow waist (85mm):**

reactivity, speed of transition from  
edge to edge, short cut driving

**sporty and playful flex**

**front rocker & early-rise tail**

**mounting point:** -8cm

**drilling:** diameter 3.5mm x L 9mm

style code: 101370

## technical specifications:

**construction:** semi-cap

ABS sidewalls all around

**core:** poplar / fiberglass

**available in two versions:** flat (ref: 101370)  
or pre-mounted with Salomon E M10 gripwalk  
bindings (ref: 101394)

# divus birdie

sharp  
fine  
incisive

## description:

Designed for ski areas with a penchant for smooth surfaces that call for trajectory, the divus birdie has the same technical characteristics as the orb, but with a narrower waist width (82 mm), a shorter radius (17 metres) and a slightly reduced rocker for a dynamic and smooth ride. The base of the ski is reinforced by a double titanal plate shaped in an H shape which concentrates the energy of the titanal and allows the ski to be energetic while being well placed on the ground. Hot in front, hot for the slopes!

## the nitty-gritty:

**small floatation:** 82mm at the waist

**light rocker:** stability, small pivot, good edge grip, floatation off

**classic long camber:** classic camber under the foot with extended ski/snow contact for alpine style cornering

**short radius (17m) and narrow waist (82mm):** reactivity, speed of transition from edge to edge

**energetic flex with very good grip along its entire length:** a high-performance

yet manoeuvrable ski

**mounting point:** -9 cm

**drilling:** diameter 4.1mm x L 9mm

style code: 101369

## technical specifications:

**construction:** semi-cap

ABS sidewalls all around

**core:** poplar / fiberglass

**added material:** double titanal H-plate + aluminium tail insert

style code: 101394

## description:

With a lighter core and a softer flex than its universal avatar, the vertis birdie is the preferred choice for women skiers who want an accessible, high performance, on-piste machine. With its short radius (15 metres) and 85mm at the base, it benefits from a very fast edge-to-edge transition that makes it a pleasure to ride. With three intermediate sizes (152, 159, 169), the vertis birdie is our women's piste ski par excellence.

## the nitty-gritty:

**small floatation:** 85mm at the waist

**light rocker:** stability, small pivot, good edge grip, floatation off

**classic long camber:** classic camber under the foot with extended ski/snow contact for alpine style cornering

**short radius (15m) and narrow waist (85mm):**

reactivity, speed of transition from edge to edge, short cut driving

**sporty and playful flex**

**front rocker & early-rise tail**

**reinforced topsheet grip for more protection**

**stainless steel front tip protection**

**pre-mounted with E M10 GW White L90**

## technical specifications:

**construction:** semi-cap

ABS sidewalls all around

**core:** poplar / fiberglass

## 152.6

# poles

# stans

style code: 101491

## description:

The stans is a carbon pole for speed at your fingertips, with style, for skiers who like lightness and reactivity. Aggressive and efficient, it is built around a 13mm shaft with a specific handle. Its angular morphology allows a very good grip; it is accompanied by a comfortable and easy to handle strap. On the print side, the stans has a very resistant compact basket and a steel tip. Available in three unique colours, everyone will be able to find the pair that matches their skis, their outfit... Or better still, their spirit.

## the nitty-gritty:

**tube:** 13mm diameter, carbon  
blackcrows injected rubber grip

**strap:** soft

**piste basket:** 60mm diameter

# tech bags

Our technical backpacks and ski bags, like all blackcrows products, are objects thought and designed for a practice often technical and sometimes very demanding. Starting with the Dorsa and Sacus, we developed a whole family of packs for all flavors of ski styles. Those are objects of desire, for a total efficiency in all situations and with a subtle touch of style, because for us details are important.

This brand new range of technical bags shine from the inside and also from the outside, with full chevron prints, subtle and recognizable, for everyday use or to go very far.

tech bags

# new dorsa 27

style code: 101742

## description:

The dorsa 27-litre is an ultra-refined bag focused on the functional demands of ski mountaineering. It has a strong identity that reaches into the finest of details, we've somehow managed to improve it again this year in a new version (more practical zips and dedicated pockets). All in black, swathed in Cordura fibre and equipped with an embroidered black crows crest, the dorsa sits like a blackbird perched on your back. Designed to accompany skiers anywhere from resort skiing to big alpine touring adventures. Developed in collaboration with Bruno Compagnet, the dorsa 27 meets the demands of ski mountaineers: robust, ergonomic, light. All you need and nothing you don't.

## technical specifications:

### 2 access to the main compartment:

Roll top

zip opening on the backpanel side. (no more snow stuck on backpanel)

safety pocket on front side (shovel & probe)

real goggle pocket on top/small pocket on back

heat molded backpanel for a better finishing

27L volume, slim profile to keep it closed to the back

superstrong outer fabric in Cordura 500D

2 ski carrying systems (diagonal/A frame)

2 ice axe system

metal hipbelt buckle, to avoid

any breakage in gondolas

super contrasted lining

# technologies

**Innovation and the search for new technologies resonate in the chamonix valley, where our teams work connected with the world to bring the best to our products.**

From our first steps on the snow to our futuristic desires, the ingredients that make up the blackcrows galaxy are enriched each winter with new weapons of technology. The elements of language evolve, but behind each ski are ingredients that we wish to evoke with the transparency of a UV varnish.
