# pursuit of pleasure

# pursuit of pleasure

Since founding **blackcrows** we have met many individuals. Our **community** grew thanks to **our differences**, as well as a simple, pivotal common **love for snow, mountains, and skiing**.

We may not have the same **definition** of **joy, happiness, or freedom** but we all agree on one simple, bare truth:

**Together we fly higher**

Let's **celebrate** a community with no equivalent. Because through our **love for ski** we share universal values that bond beyond the slopes and get us ever more pumped up when we **experience the journey**, the mountain and the descent.

**Enjoy yourself** and join the blackcrows squadron in a quest for **freedom** and **adventures** for a new season in **the pursuit of pleasure**.

# hardgoods

One of the big changes in our ski collection this season, apart from the **shiny newcomers**, is that we have reduced our offer to 3 ranges, making it oh so simple and to the point. It is now even easier to find your way around, and it better reflects our idea of skiing. Particularly, the **«resort» skis** (formerly Resort range) have been integrated into the All Terrain range, a classification that says a lot about our vision of a more **natural**, more **versatile lift-assisted** skiing **experience**.

The concept of our graphic direction is also **very simple**, in the word of our own Yorgo Tloupas, blackcrows Paris-based creative director : «logo logo logo». The Big Mountain skis display only part of the logo, with a zoom effect that mirrors their size (**they are BIG**) and a base that shows the logo in full length. On the other hand, the All

Terrain skis are zoomed out (they are thinner) with a base showing a logo **discreetly stamped** behind the tip.

We have renewed a **legend** of our Big Mountain range, inventing new perspectives for lovers of the biggest ski in our range. The new Nocta, third version of one of our most emblematic skis, now has a **cambered** profile, a **slightly softer flex** to accommodate the new shape, and undoubtedly sexy tips.

The new Draco Freebird is the only one with a double tip in the Freebird touring range, dedicated to the **wildest skin ups**. It's also the largest Freebird, over 110mm wide, so you can embark on **unique** and **magical** adventures and always keep this beautiful smile on your face.

**Buckle up. Let's get to it.**

# big mountain

Our Big Mountain collection once again pushes the limits of our imagination, and maybe yours, in a place that is dear to us, that saw us rise and expand our scope. We want to progress always, to push forward the widest skis in our range, the most crucial ones, those that carry crows from all horizons in the wildest and most extreme conditions.

Let's all find the way to our magic mountain. The one that delights us all. The one where the wild crows hover, as if waiting for our eager tips to carve the widest powder turns.

big mountain

new **nocta**

**pow chaser**  
**surfy**  
**voluptuous**

**description:**

The third generation of our iconic ski gains in camber what it loses in rigidity, keeping the same kind balance.  
A ski intended above all to surf the best powder, it features a rare asymmetrical design and is stable and reassuring at all speeds. For all the aesthetes of deep conditions. Beware, its special tips will be talked about in the lift line.

**the nitty-gritty:**

**construction:** semi-cap, ABS sidewalls all around  
**core:** paulownia/ poplar/ fiberglass  
**floatation:** high with 122mm at the waist  
**rocker:** double rocker, great maneuverability, control & pivot  
**camber:** classic medium camber underfoot with intermediate ski/snow contact for a great balance between stability and handling  
**sidecut:** slightly straight sidecut for more stability and better balance between firmness and maneuverability  
**flex:** intermediate over the entire length of the ski, performance and forgiveness  
**mounting point:** -6cm  
**drilling:** diameter 3.5mm x L 9mm  
do not mount with telemark bindings

the size does matter

big mountain

new **solis**

beautiful  
homogeneous  
generous

**description:**

The ski dedicated to the demands of steep slopes. The result of long development in the field, the Solis combines a homogeneous flex throughout the ski, a fairly firm tip and tail and a long radius in the tip lift. This combination provides an exclusive pivot, avoids oversteering in steep passages and provides a secure heel when the pack is heavily loaded. The Solis also benefits from a reinforced edge and a very good grip thanks to a titanal plate under the foot. Voluntarily ultra specific, the Solis is the ski for verticality lovers.

**the nitty-gritty:**

**construction:** semi-cap, ABS sidewalls all around

**core:** paulownia/ poplar

**added material:** glass & carbon fibers, titanal reinforcement under the bindings

**floatation:** good with 100mm at the waist

**rocker:** progressive front rocker and early rise tail for pivot control, maneuverability and floatation

**camber:** classic medium camber underfoot with intermediate ski/snow contact for a great balance between stability and handling

**sidecut:** long radius to get a very good grip on hard snow and specific to steep skiing

**flex:** homogeneous flex over the entire length of the ski to avoid oversteering

**mounting point:** -9cm

**drilling:** diameter 4.1mm x L 9mm

style code: 101873

big mountain

# anima

stable  
powerfull  
decisive

## description:

The Anima is a big mountain ski that combines power and maneuverability. It is a machine that easily enters curves, is very playful, performs well on hard snow for its size and is very stable at high speeds. The Anima is a ski that embraces the creativity of the skier (big lines, jumps, quick pivots, switch) and always keeps you on your toes. It's an animal and it's the ski of the 2021 Freeride World Champion Kristofer Turdell.

## the nitty-gritty:

**construction:** semi-cap, ABS sidewalls all around

**core:** poplar / fiberglass

**added material:** carbon/ kevlar stripes

**floatation:** high with 115mm at the waist

**rocker:** double rocker, great maneuverability, control & pivot

**camber:** classic camber underfoot with short ski/snow contact for more maneuverability

**sidecut:** long curve radius for high speed stability & good grip

**flex:** very progressive flex in the tip & tail but firmer at the ski/snow contact points for a good deformation in soft snow and efficient on hard snow

**mounting point:** -6cm

**drilling:** diameter 3.5mm x L 9mm

# corvus

control  
original  
warrior

## description:

A historical model of blackcrows, the Corvus remains the guardian of the temple with its alpine soul associated with a reverse camber. Intended for the purest freeride, the Corvus version 2023 combines a very good pivot thanks to its original profile and a very strong grip on hard terrain thanks to the flat portion under the foot and its double titanal plate. The ski is both powerful and well anchored to the ground. Warrior by nature, it enjoys this balance of forces for ultimate confidence on all types of terrain.

## the nitty-gritty:

**construction:** semi-cap, ABS sidewalls all around

**core:** poplar / fiberglass

**added material:** double titanal plates

**floatation:** good with 107mm at the waist

**rocker:** reverse camber and flat surface in the middle of the ski for great pivot and very powerful grip

**sidecut:** slightly straight sidecut for an attacking soul

**flex:** solid flex underfoot thanks to double titanal plates for stability and precision, then progressive in tip and tail for comfort and efficiency

**mounting point:** -8cm

I'm difficult

# touring

**Our exploration of the mountains knows no bounds, it's an activity, a passion that inspires us and reminds us of our roots. Our Freebird range, that has been around since the early years of the brand, and most touring skis return this year largely unchanged, eager to take on the uphill and show their talent on the downhill.**

They are designed with this double ambition, equivocal and ambiguous, to provide the best of both worlds, to offer the most fluid skiability while accommodating the lightest weight. All of them are «unisex», designed for women or men depending on size and length, because we all share one love for skiing, with different shapes and volumes.

mountain touring

# new draco freebird

lightness  
effectiveness  
no stress

## description:

The performance and skiability of a rookie with fierce ambitions. This is the only twin tip model in our touring range, a ski designed to offer joyful adherence, which allows better skiing with less effort. It is light, but does not trade weight for sensations, the Draco is for skiers who want to be wild and creative. Made to search and find happiness.

## the nitty-gritty:

**construction:** semi-cap, cap in tip & tail for lightness & handling, ABS sidewalls underfoot

**core:** paulownia/ poplar

**added material:** glass & carbon fibers

**floatation:** high with 110mm at the waist

**rocker:** double rocker, great maneuverability, control & pivot

**camber:** classic camber underfoot with short ski/snow contact for more maneuverability

## mountain touring

# ova freebird

**athletic**  
**featherweight**  
**beastie**

### description:

After nine years in the range and on its third update, the Ova Freebird has been largely revamped again. It is a ski with a noticeably sportier flex, very lively, but still very accessible and easy-going. The objective of lightness does not impose any constraints on its downhill behaviour, which must be comfortable and exemplary, and its new core makes it a beautiful beast of power, which gains in aggressiveness without losing its popularity.

### the nitty-gritty:

**construction:** semi-cap, cap in tip & tail for lightness & handling, ABS sidewalls underfoot

**core:** paulownia

**added material:** glass & carbon fibers, titanal reinforcement under the bindings

**floatation:** intermediate with 85mm at the waist

**rocker:** progressive front rocker and early rise tail for pivot control, maneuverability and floatation

**camber:** classic long camber with extended ski/snow contact for alpine style carving

**sidecut:** slightly short sidecut for good carving & reactivity

**flex:** tolerant & progressive flex to be comfortable in curves and efficient in all terrain

**reinforcement:** Titanal plates under the bindings for a better screw retention

## mountain touring

# mentis freebird

light  
comfort  
raider

### description:

A ski born from the desire to develop a thin, high-performance and very light machine, but with the aim of achieving very high skiability for this type of range.

A width of 80mm gives it comfort and assurance, while maintaining a light weight. The Mentis is all about technology for great comfort in soft snow and precise handling in rough terrain. When you're on top very quickly, you can look down with delight. The possibilities of the Mentis know no boundaries.

### the nitty-gritty:

**construction:** semi-cap, cap in tip & tail for lightness & handling, ABS sidewalls underfoot

**core:** paulownia

**added material:** glass & carbon fibers, titanal reinforcement under the bindings

**floatation:** light with 80mm at the waist

**rocker:** light front rocker for good pivot and easy turn transition

**camber:** classic long camber with extended ski/snow contact for alpine style carving

**sidecut:** slightly straight sidecut for more stability and better balance between firmness and maneuverability

**flex:** firm flex for stability and precision, with progressive flex in tip for comfort and efficiency

**reinforcement:** Titanal plate under the bindings for a better screw retention

**mounting point:** -9.5cm

**drilling:** diameter 4.1mm x L 9mm

do not mount with telemark bindings

# skins

The pilus skin has the particularity of having a thin membrane that protects and seals the glue. Strong and durable, very practical and unaffected by temperature variations, the pilus is the ideal partner to climb serenely towards bliss.

# pilus super light

## description :

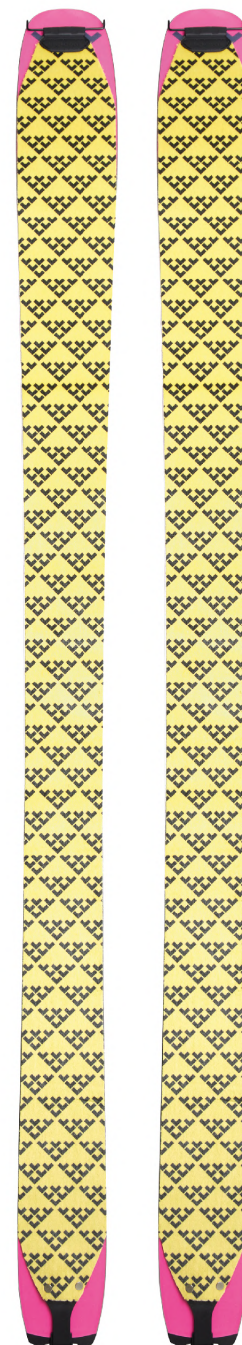

The pilus skin has the particularity of having a thin membrane that protects and seals the glue. Strong and durable, very practical and unaffected by temperature variations, the pilus is the ideal partner to climb serenely towards bliss. The super light membrane is light, very resistant and 100% waterproof. Hybrid composition (mohair / nylon) for an excellent ratio of hold when climbing and glide when descending. Water repellent material (fluorine free): reduction of chemical components which does not alter performance but reduces the ecological impact.

## the nitty-gritty :

**Plush material** : mix mohair & polyamid  
**Hydrophobic treatment** PFC free  
**Light membrane**  
**Efficient and durable glue**  
**Tip fixation** : metal hook tail  
**Fixation** : adjustable strap

## pre-cut model sizes :

101709 **pilus camox freebird**  
 (157/164/171/178/183/188)  
 101262 **pilus corvus freebird**  
 (176/183/188)  
 101993 **pilus draco freebird**  
 (175/181/189)

# all terrain

**We have made some bold choices (it's the same when we ski) that will have a lasting impact on the structure of this range for the coming season. Indeed, from now on, the All-Terrain range will be even more diverse, by welcoming the skis of our former Resort range. Because we want all our skis to behave on natural snow, whatever their width.**

However, we haven't mixed chalk with edelweiss, and two of our models that were exclusive to groomed terrain have disappeared from our range, replaced by an ambitious new ski.

all terrain

# mirus cor

playful  
modern  
carver

## description:

The Mirus Cor is a ski object born of performance and design, to achieve an alliance between two worlds: freestyle and the most angular carves of the moment.

Built with a long rocker tip and tail, it can be skied short to play with piste and the most playful sidehits. It is carving in a blackcrows way, a true freestyle all terrain. Accessible, solid and creative in every respect. COR The Cor blackcrows acronym is displayed on products that seek to disrupt the practice and push the innovation on the snow. With no boundaries.

## the nitty-gritty:

**construction:** semi-cap, ABS sidewalls all around

**core:** poplar / fiberglass

**added material:** single titanal plate

**floatation:** intermediate with 87mm at the waist

**rocker:** double rocker with fish tail, great maneuverability, control & pivot

**camber:** classic medium camber underfoot with intermediate ski/snow contact for a great balance between stability and handling

**sidecut:** very short radius, super reactivity with a fast edge to edge transition

**flex:** energetic with a very good grip all along the ski for high performance but still very playful

**mounting point:** -3.5cm

**drilling:** diameter 4.1mm x L 9mm

# new junius birdie

player  
wild  
fun

## description:

Our junior ski (from 7 to 13 years old) has been dramatically improved and is now available in 5 different sizes.

Very accessible, it radiates the pleasure of skiing, and features a twin tip to enjoy all the subtleties of freeskiing. With its natural flex and new construction (ABS sidewalls, woodcore) the junius is designed to perform well in all snow conditions.

## the nitty-gritty:

**construction:** cap semi-cap step down, ABS sidewalls underfoot

**core:** PU / fiberglass

**floatation:** intermediate with 76-86mm at the waist

**rocker:** double rocker, great maneuverability, control & pivot

**camber:** classic medium camber underfoot with intermediate ski/snow contact for a great balance between stability and handling

**sidecut:** short radius to make it easier to learn carving

**flex:** soft to be comfortable and accessible

**mounting point:** -5cm

**drilling:** diameter 3.5mm x L 7mm

# pack serpo rt + e m12 gw

**lively**  
**tolerant**  
**versatile**

## description:

The Serpo is a young and lively ski in the range for curving on the piste and poking a bit off-piste. With 93mm at the base, it is a good carver, it is there to really play with the terrain with its tolerant flex but it also has positive response thanks to its metal layer for grip and stability. For all that, its performance does not erase the ease and pleasure of the game.

## the nitty-gritty:

**construction:** semi-cap, ABS sidewalls all around

**core:** poplar / fiberglass

**added material:** double titanal plates underfoot

**floatation:** intermediate with 93mm at the waist

**rocker:** progressive front rocker and early rise tail for pivot control, maneuverability and floatation

**camber:** classic camber underfoot with short ski/snow contact for more maneuverability

**sidecut:** slightly straight sidecut for an attacking soul

**flex:** energetic with double titanal plates underfoot for a better response

**mounting point:** -8cm

**drilling:** diameter 4.1mm x L 9mm

# new traverse multis backpack

## description:

Sold with a set of pouches (size S and L) with reflective print, this versatile backpack features tons of pockets and zippers (we even wonder if we did not go too far).

Open any of its zippers to flash the « corvus pink » liner adorned with black chevrons, contrasting with the dark design outside. Perfectly modular, to go to the gym or at work with style for those who do this kind of thing. It even features a stowaway pocket with an integral rain protection, to keep cool even under the most fearful weather.

## the nitty-gritty:

**outer fabric:** P610D cordura© fabric/ 100% polyester

**lining:** P210D/ 100% polyester

27 L volume

Superstrong outer fabric in Cordura P610D fabric

Super contrasted lining chevron details

Multi storage pockets for everyday use

Laptop pocket

Intuitive modularity with external pouches

Sold with one small pouch and one big pouch

Heat molded backpanel

Luggage strap
