

**workbook hardgoods  
collection 24.25**

united by that force  
we call ski culture

# pursuit of pleasure

**Pleasure** follows the **movement of nature**.  
It winds its way through this infinite source  
of action. Tiny mountain travelers, **the vertigo  
of happiness** can be read in our eyes and on  
our lips. **Unique** for our singularities and **united**  
by that force we call **ski culture**.

# hardgoods collection

Our offer spans **3 main ranges**, making it oh so simple and to the point. It is easy to find your way around, and it reflects our idea of skiing: **Big Mountain, Touring** and our largest, **All Terrain** range featuring meant for a lift-assisted skiing experience, on piste and off.

The concept of our graphic direction this season is called « **steps** », a **bold and colorful** use of the chevron as both 3D steps and

a color gradient, for a design concept that is both consistent and **visually attractive**.

We have **renewed the Corvus**, the original blackcrows ski, the founder, the black stallion. Our big mountain ski, with a **new shape** and **new construction**, carries the essence of blackcrows skiability: every day, every kind of snow, every terrain, the **pleasure** and **playfulness** of curves.

The brand-new **Octo** and **Octo Birdie** take the **spotlights** as the main new skis of our all-terrain range this season. Akin to the **Mirus Cor**, this is a **fun and charming** ski, more mainstream yet still naughty. Its ambition is to rejuvenate an **academic style** of skiing, at the same time easy to access and ready to rock the resort with **speed and carving**.

Buckle up. Let's get to it.

# big mountain

The size does matter

Once again, our Big Mountain range pushes the limits of our imagination, and maybe yours, to a place that is dear to us, that sees us rise and expand our scope. We want to progress, always, to push forward the widest skis in our range, the most crucial ones, those that carry crows from all horizons to the wildest and most extreme conditions.

Let's all find the way to our magic mountain. The one that delights us all. The one where the wild crows hover, as if waiting for our eager tips to carve the widest powder turns.

big mountain

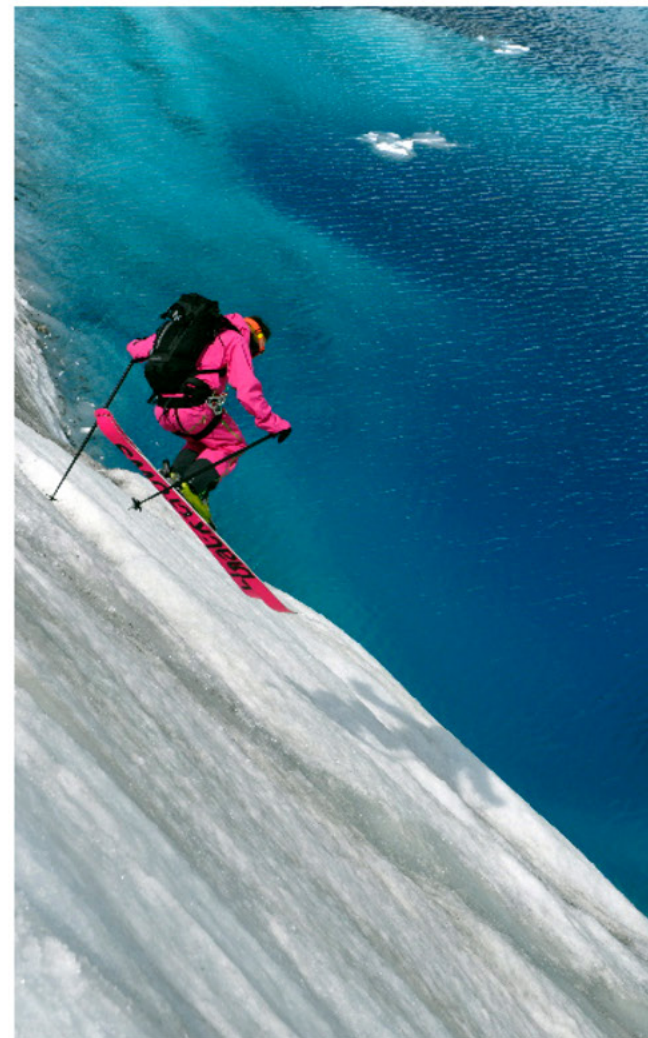

new

# corvus

Respecting its roots, the new corvus keeps its vigorous flex while modernizing its shape to be more playful. With a double rocker and a classic camber associated with a slight pintail and directional profile, it gains pivot, breaks shorter and therefore increases control. For our master ski since day 1, everything changed but nothing changed. A modern take on freeride performances that will take on you.

The construction has also been designed to reduce its carbon footprint with a thicker woodcore and less added materials. The ABS sidewalls and edges are recycled, and the top sheet uses a TPU material that halves the impact on this segment.

**"We wanted to create a ski working well on every kind of snow, because in cham there is all type of snow in a same run from top of Aiguille du Midi to Chamonix downtown"**  
Camille Jaccoux, blackcrows founder.

sorry but this is not chicken

big mountain

new **corvus**

modern  
alpine  
stallion

**description:**

The Corvus is the original blackcrows ski, the founder, the black stallion. Born in the winter of 2007-2008, it is the essence of blackcrows skiability: everyday, every kind of snow, every terrain, the pleasure and curve playfulness. For 2025, here's the fifth version of the mothership. And it's an all-new shape: classic camber, straight lines, 2 progressive rockers, a dash of titanal, a touch of alpine, and here's the new beast for big mountain skiing, made to enjoy big curves, go fast, and pivot in couloirs. This version marks the return of the black bird to the zenith of free skiing in big terrain.

**the nitty-gritty:**

**construction:** semi-cap, ABS sidewalls all around

**core:** poplar-beech / fiberglass

**added material:** single titanal plate

**floatation:** high with 110mm at the waist

**rocker:** double rocker, great maneuverability, control & pivot

**camber:** classic medium camber underfoot with intermediate ski/snow contact for a great balance between stability and handling

**sidecut:** long curve radius for high speed stability & good grip

**flex:** solid flex underfoot for stability and precision, then progressive in tip and tail for comfort and efficiency

**mounting point:** -6cm

**drilling:** diameter 4.1mm x L 9mm

style code: 102146

wild at heart

big mountain

# solis

beautiful  
homogeneous  
generous

## description:

Our ski dedicated to challenging the steepest slopes combines a homogeneous flex throughout the ski, a fairly firm tip and tail and a long progressive front rocker.

This combination provides an exclusive pivot, avoids oversteering in steep passages and provides a secure heel when the backpack is heavily loaded. The Solis also benefits from a very good grip thanks to a titanal plate under the foot. Voluntarily ultra specific, this is the ski for verticality lovers.

## the nitty-gritty:

**construction:** semi-cap, ABS sidewalls all around

**core:** paulownia/ poplar

**added material:** glass & carbon fibers, titanal reinforcement under the bindings

**floatation:** good with 100mm at the waist

**rocker:** progressive front rocker and early rise tail for pivot control, maneuverability and floatation

**camber:** classic medium camber underfoot with intermediate ski/snow contact for a great balance between stability and handling

**sidecut:** long radius to get a very good grip on hard snow and specific to steep skiing

**flex:** homogeneous flex over the entire length of the ski to avoid oversteering

**mounting point:** -9cm

**drilling:** diameter 4.1mm x L 9mm

style code: 102147

# all terrain

Am I making sense?

**Our all terrain range is large and covers diverse types of skiing and cultural styles, from bold carving skiers to crazy all around powder hounds. Indeed, it involves all skis dedicated to lift accessed fun, on and off the pistes. Because we want all our skis to behave on natural snow, whatever their width.**

Here are ambitious skis that will bring chevron in every shape of curve, on every aspect of the ski resort.

all terrain

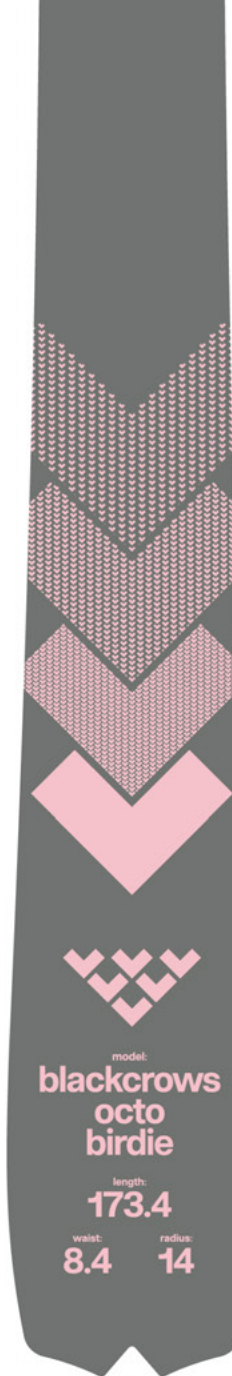

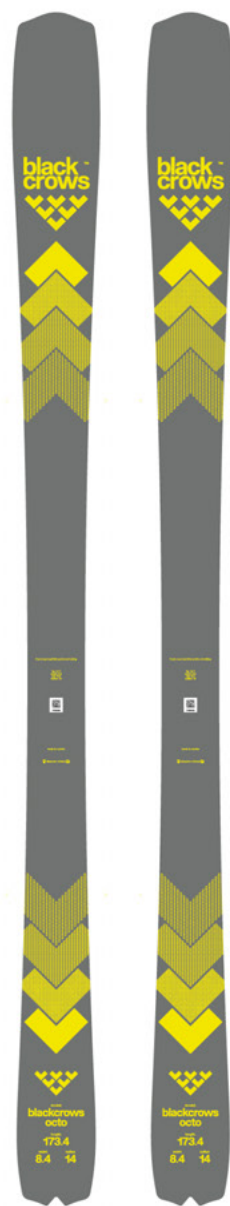

new

# octo & octo birdie

Here is our brand new ski and there are more than 8 good reasons to fall in love with it. One of them would be the influence of its heredity, as one might have suspected a lineage with the Mirus Cor. Well, yes, there is a match, the Octo is crazy about resort wild joy.

**For the rest, with a short rocker in the tip and an almost flat tail, it is a ski with a classic construction, longer radius and a less centered position. In other words, it keeps the swallowtail spirit but enhances alpine sensations. Wild joy, indeed.**

*"I wanted to make a ski in the tradition of the Mirus Cor, but with a flat heel and a more consensual look. The important thing was to keep the fun, with a more polished sober ski"*  
Julien Regnier, blackcrows ski shaper.

# mirus cor

New design but same core, the mirus cor continues to brighten resort days. At the crossroads of carving and freestyle, this twenty-first century ski encourages geometric curves with its short radius and great grip, as well as acrobatic edge-of-piste antics thanks to its double rocker and centered positioning. Its 87 mm skate and wide tip also enable it to take advantage of off-piste proximity. **Accept your youth, you'll be the master of the game.**

c'est ça du ski sauvage?

all terrain

# mirus cor

playful  
modern  
carver

## description:

The Mirus Cor is a ski object born of performance and design, to achieve an alliance between two worlds: freestyle and the most angular carves of the moment.

Built with a long rocker tip and a swallow tail, it should be skied short to play on piste and with the most playful sidehits. It speaks carving in a blackcrows way, also designed as a true freestyle all terrain. Accessible, solid and creative in every respect.

## the nitty-gritty:

**construction:** semi-cap, ABS sidewalls all around

**core:** poplar / fiberglass

**added material:** single titanal plate

**floatation:** intermediate with 87mm at the waist

**rocker:** double rocker with fish tail, great maneuverability, control & pivot

**camber:** classic medium camber underfoot with intermediate ski/snow contact for a great balance between stability and handling

**sidecut:** very short radius, super reactivity with a fast edge to edge transition

**flex:** energetic with a very good grip all along the ski for high performance but still very playful

**mounting point:** -3.5cm

**drilling:** diameter 4.1mm x L 9mm

## description:

A very popular ski, accessible and more sensual than consensual.  
The Captis Birdie freestyle heritage and reasonable but substantial width make for a great all-terrain ski that holds its edge well for carvers, and is easy to steer, suiting many different riding styles. Always incisive but also very playful, it's a pleasure to enjoy all winter in all conditions.

## the nitty-gritty:

**construction:** semi-cap, ABS sidewalls all around

**core:** poplar / fiberglass

**floatation:** intermediate with 90mm at the waist

**rocker:** double rocker, great maneuverability, control & pivot

**camber:** classic medium camber underfoot with intermediate ski/snow contact for a great balance between stability and handling

**sidecut:** slightly short sidecut for good carving & reactivity

**flex:** tolerant & progressive flex to be comfortable in curves and efficient in all terrain

**mounting point:** -6cm

**drilling:** diameter 3.5mm x L 9mm

# touring

Let's get lost.

**Our exploration of the mountains knows no bounds, it's an activity, a passion that inspires us and reminds us of our roots. Our Freebird range is an essential part of our brand, a spirit of freedom, with a timeless design and recognized performance.**

They share this double ambition, equivocal and ambiguous, to provide the best of both worlds, to offer the most fluid skiability while accommodating the lightest weight. All of them are «unisex», designed for women or men depending on size and length, because we all share one love for skiing, with different shapes and volumes.

## mountain touring

# draco freebird

lightness  
effectiveness  
no stress

### description:

The performance and skiability of a modern ski with fierce ambitions.

The Draco freebird is the only double rocker model in our touring range, a ski designed to offer joyful adherence, which allows better skiing with less effort. It is light, but does not trade weight for sensations, for skiers who want to be wild and creative. Made to ski in the pursuit of happiness, and find it.

### the nitty-gritty:

**construction:** semi-cap, cap in tip & tail for lightness & handling, ABS sidewalls underfoot

**core:** paulownia/ poplar/ fiberglass

**floatation:** high with 110mm at the waist

**rocker:** double rocker, great maneuverability, control & pivot

**camber:** classic camber underfoot with short ski/snow contact for more maneuverability

**sidecut:** slightly straight sidecut for more stability and better balance between firmness and maneuverability

**flex:** firm flex for stability and precision, with progressive flex in tip for comfort and efficiency

**mounting point:** -5cm

**drilling:** diameter 3.5mm x L 9mm

## mountain touring

# corvus freebird

**control**  
**original**  
**warrior**

### description:

The choice of skiers dedicated to an unadulterated form of touring, our Corvus Freebird benefits from a slight rocker rise in the tip, a dynamic tail and long sidecut.

The result is a ski that is aggressive and particularly accurate when entering and exiting the curve, with a very energetic behaviour. Its titanium plate underfoot makes it safer to mount hybrid bindings. Life is always better with pink.

### the nitty-gritty:

**construction:** semi-cap, ABS sidewalls all around

**core:** poplar

**added material:** glass & carbon fibers, titanal reinforcement under the bindings

**floatation:** good with 107mm at the waist

**rocker:** progressive front rocker and early rise tail for pivot control, maneuverability and floatation

**camber:** classic long camber with extended ski/snow contact for alpine style carving

**sidecut:** long curve radius for high speed stability & good grip

**flex:** firm flex for stability and precision, with progressive flex in tip for comfort and efficiency

**reinforcement:** Titanal plate under the bindings for a better screw retention

**mounting point:** -9cm

**drilling:** diameter 4.1mm x L 9mm

do not mount with telemark bindings

# mentis freebird

light  
comfort  
raider

### description:

A ski born from the desire to develop a thin, high-performance and very light plaything, but with the aim of achieving very high skiability in this category. A width of 80mm gives it comfort and assurance, while maintaining a light weight. The Mentis is all about technology for great feelings in soft snow and precise handling in rough terrain. When you can move to the top very quickly, you are able to look down with delight. The possibilities of the Mentis know no boundaries.

### the nitty-gritty:

**construction:** semi-cap, cap in tip & tail for lightness & handling, ABS sidewalls underfoot

**core:** paulownia

**added material:** glass & carbon fibers, titanal reinforcement under the bindings

**floatation:** light with 80mm at the waist

**rocker:** light front rocker for good pivot and easy turn transition

**camber:** classic long camber with extended ski/snow contact for alpine style carving

**sidecut:** slightly straight sidecut for more stability and better balance between firmness and maneuverability

**flex:** firm flex for stability and precision, with progressive flex in tip for comfort and efficiency

**reinforcement:** Titanal plate under the bindings for a better screw retention

**mounting point:** -9.5cm

**drilling:** diameter 4.1mm x L 9mm

do not mount with telemark bindings

# skins

Feeling smoother than a dolphin.

**The pilus skin has the particularity of having a thin membrane that protects and seals the glue. Strong and durable, very practical and unaffected by temperature variations, the pilus is the ideal partner to climb serenely towards bliss.**

Available in super light and ultra light membranes, those are light (even ultra light), very resistant and 100% waterproof. Their hybrid composition (mohair/nylon) makes for an excellent ratio of hold when climbing and glide when descending.

Made with a fluorine free water repellent material for a smaller ecological footprint (much better for the dolphins).

# pilus super light

## description :

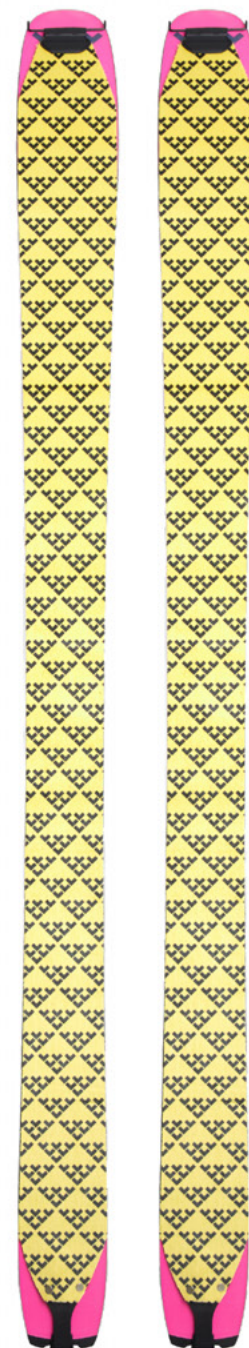

The pilus skin has the particularity of having a thin membrane that protects and seals the glue. Strong and durable, very practical and unaffected by temperature variations, the pilus is the ideal partner to climb serenely towards bliss. The super light membrane is light, very resistant and 100% waterproof. Hybrid composition (mohair / nylon) for an excellent ratio of hold when climbing and glide when descending. Water repellent material (fluorine free): reduction of chemical components which does not alter performance but reduces the ecological impact.

## the nitty-gritty :

**Plush material** : mix mohair & polyamid  
**Hydrophobic treatment PFC free**  
**Light membrane**  
**Efficient and durable glue**  
**Tip fixation** : metal hook  
**Tail fixation** : adjustable strap

## pre-cut model sizes :

# new dorsa 22

## description:

The little brother of Dorsas 27 and 37 is designed to be taken everywhere, from the highest slopes to the hottest of city rendez-vous.

Designed by people who usually manipulate their bag with gloves, the Dorsa 22 is what is called an efficient product. Wide aperture, shovel-probe front pocket, essential organisation pockets, ski and ice axe carrying systems are among the essentials for mountain use. Removable hip belt and a very tight conception – no dangling – make it totally suitable for urban uses. Its super strong cordura fabric winds up the strength and durability chapters. From early morning cable cars to early morning subways, with or without gloves, admire its technical details while approaching your next adventure. Bonne chance.

# dorsa 37

### description:

The largest version of the Dorsa takes the inspiration and aesthetic from the dorsa 27 and adds more volume, allowing skiers to get deep into the mountains for longer, with the bonus of a removable helmet mesh holder.

All in black, swathed in Cordura fabric and adorned with a reflective print, the dorsa sits like a blackbird perched on your back. Designed to follow skiers anywhere from resort skiing to big alpine touring adventures. Developed in collaboration with Bruno Compagnet, the dorsa 37 meets the demands of ski mountaineers: robust, ergonomic, light. All you need and nothing you don't.

### the nitty-gritty:

**outer fabric:** P610D Cordura© fabric / 100% polyester

**lining:** P210D/ 100% polyester

37L volume, slim profile to keep it closed to the back

**Dimensions:** 71 x 32 x 20 cm / 28 x 13 x 8 inches

Superstrong outer fabric in Cordura P610D fabric

Super contrasted lining with chevron details

**2 accesses to the main compartment:** Roll top and zipper opening on the backpanel side

Safety pocket on front side (shovel & probe)

Real goggle pocket on top

Side keys pocket

Heat molded backpanel

2 skis carrying systems (diagonal and A-frame)

2 ice axes carrying systems

An extra carrying system for helmet

Metal hipbelt buckle, to avoid any breakage in gondolas

**style code:** 101743

## mountain touring

# dorsa freebird

### description:

This full featured touring backpack is designed for fast and light ascents, in summer or more conveniently in the winter.

Its ski hook on the top and crampons pocket on the bottom, tell the story of this blackcrows item made for an uncompromising way of going far and deep in the wildest mountain ranges, while keeping our characteristic design. It features more dedicated pockets and mesh compartments than a safari addict and a fly fishing expert could count.

### the nitty-gritty:

**outer fabric:** X-PAC® fabric/38% polyamide 62% Polyester

**lining:** P210D / 100% polyester
