hardgoods collection

Our offer spans 3 main ranges, making it oh so simple and to the point. It is easy to find your way around, and it reflects our idea of skiing: Big Mountain, Touring and our largest, updated, All Terrain range meant for a lift-assisted skiing experience, on piste and off.

This season, our colorful graphic design is all about the magic of optics. An inverted design from the front to the back with a magical seamless transition.

Just the way we like it.

The All Terrain range is in the spotlight this season, with the arrival of the Sato and Sato Birdie, as well as, a celebration of the fourth version of the Camox and Camox Birdie.

The brand new Sato and Sato Birdie are engaging, lively, eye-catching skis made to enjoy fast and graceful turns. Easy to access and imbued with the playful spirit that characterizes our skis.

Our renewed Camox and Camox Birdie, are both more confident and more incisive thanks to a shorter radius, more even flex and improved pivot. These skis gain comfort while maintaining their high-performance standards. The embodiment of All Terrain skiing, they are easy to get to grips with.

Bon ski.

big mountain

The size does matter

Once again, our Big Mountain range pushes the limits of our imagination, and maybe yours, to a place that is dear to us, that sees us rise and expand our scope. We want to progress, always, to push forward the widest skis in our range, the most crucial ones, those that carry crows from all horizons to the wildest and most extreme conditions.

Let's all find the way to our magic mountain. The one that delights us all. The one where the wild crows hover, as if waiting for our eager tips to carve the widest powder turns.

big mountain

corvus

modern alpine stallion

description:

The Corvus is the original blackcrows ski, the founder, the black stallion. Born in the winter of 2007-2008, it is the essence of blackcrows skiability: everyday, every kind of snow, every terrain, the pleasure and curve playfulness. Classic camber, straight lines, 2 progressive rockers, a dash of titanal, a touch of alpine, and here's the new beast for big mountain skiing, made to enjoy big curves, go fast, and pivot in couloirs. This version marks the return of the black bird to the zenith of free skiing in big terrain.

the nitty-gritty:

construction: semi-cap, ABS sidewalls all around

core: poplar-beech / fiberglass

added material: single titanal plate

floatation: high with 110mm at the waist

rocker: double rocker, great maneuverability, control & pivot

camber: classic medium camber underfoot with intermediate ski/snow contact for a great balance between stability and handling

sidecut: long curve radius for high speed stability & good grip

flex: solid flex underfoot for stability and precision, then progressive in tip and tail for comfort and efficiency

mounting point: -6cm

drilling: diameter 4.1mm x L 9mm

style code: 102385

169.4 cm

Tip: 13.4
Waist: 11.0
Tail: 11.8

anima

stable
powerfull
decisive

description:

The Anima is a big mountain ski that combines power and maneuverability. It is a machine that easily enters curves, is very playful, performs well on hard snow for its size and is very stable at high speeds. The Anima is a ski that embraces the creativity of the skier (big lines, jumps, quick pivots, switch) and always keeps you on your toes. It's an animal and it's the ski of the 2021 Freeride World Champion Kristofer Turdell.

the nitty-gritty:

construction: semi-cap, ABS sidewalls all around

core: poplar / fiberglass

added material: carbon/ kevlar stripes

floatation: high with 115mm at the waist

rocker: double rocker, great maneuverability, control & pivot

camber: classic camber underfoot with short ski/snow contact for more maneuverability

sidecut: long curve radius for high speed stability & good grip

flex: very progressive flex in the tip & tail but firmer at the ski/snow contact points for a good deformation in soft snow and efficient on hard snow

big mountain

solis

beautiful
homogeneous
generous

description:

The ski dedicated to the demands of steep slopes. The result of long development in the field, the Solis combines a homogeneous flex throughout the ski, a fairly firm tip and tail and a long radius in the tip lift.

This combination provides an exclusive pivot, avoids oversteering in steep passages and provides a secure heel when the pack is heavily loaded. The Solis also benefits from a reinforced edge and a very good grip thanks to a titanal plate under the foot. Voluntarily ultra specific, the Solis is the ski for verticality lovers.

the nitty-gritty:

construction: semi-cap, ABS sidewalls all around

core: paulownia/ poplar

added material: glass & carbon fibers, titanal reinforcement under the bindings

floatation: good with 100mm at the waist

rocker: progressive front rocker and early rise tail for pivot control, maneuverability and floatation

camber: classic medium camber underfoot with intermediate ski/snow contact for a great balance between stability and handling

sidecut: long radius to get a very good grip on hard snow and specific to steep skiing

flex: homogeneous flex over the entire length of the ski to avoid oversteering

mounting point: -9cm

drilling: diameter 4.1mm x L 9mm

style code: 102386

173.3 cm

new **sato**

carver
incisive
popular

description:

A refined new model designed for the piste and its surroundings: the Sato is a ski bursting with joy. Precise, playful and eye-catching, this small ski loves to carve on immaculate slopes, have fun with the terrain or offer a few sessions between runs. A crystal-clear ski, a joyful ski, a blackcrows ski

Future resort star, the new Sato is a ski full of momentum that will delight those who like to spin along the slopes and roam the domains. With its median flex, it is playful and adapts easily to everyone's style, but it's also edge-holding and incisive for carving at speed. Its reasonable but consistent width makes it an all-terrain ski that can tame wild snow. A freedom-loving ski to ignite your sensual curves.

the nitty-gritty:

construction: semi-cap, ABS sidewalls all around

core: poplar / fiberglass

floatation: intermediate with 90mm at the waist

rocker: double rocker, great maneuverability, control & pivot

camber: classic medium camber underfoot with intermediate ski/snow contact for a great balance between stability and handling

sidecut: slightly short sidecut for good carving & reactivity

flex: tolerant & progressive flex to be comfortable in curves and efficient in all terrain

incisive
accessible

description:

A very popular blackcrows ski, accessible and sensual. The combination of a very progressive flex and a long effective edge provides great manoeuvrability and grip at high speeds. Its freestyle heritage and reasonable width make it an all-terrain ski that holds its edge well for carvers, and is easy to steer to suit all styles. It is always incisive but also very playful, a pleasure to enjoy all winter in all conditions.

the nitty-gritty:

construction: semi-cap, ABS sidewalls all around

core: poplar / fiberglass

floatation: intermediate with 90mm at the waist

rocker: double rocker, great maneuverability, control & pivot

camber: classic medium camber underfoot with intermediate ski/snow contact for a great balance between stability and handling

sidecut: slightly short sidecut for good carving & reactivity

flex: tolerant & progressive flex to be comfortable in curves and efficient in all terrain

mounting point: -6cm

drilling: diameter 3.5mm x L 9mm

touring

Let's get lost.

Our exploration of the mountains knows no bounds, it's an activity, a passion that inspires us and reminds us of our roots. Our Freebird range is an essential part of our brand, a spirit of freedom, with a timeless design and recognized performance.

These skis share a double ambition, to provide the best of both worlds, to offer the most fluid skiability while accommodating the lightest weight. All of them are «unisex», designed for women or men depending on size and length, because we all share one love for skiing, with different shapes and volumes.

mountain touring

draco freebird

lightness
effectiveness
no stress

description:

The performance and skiability of a rookie with fierce ambitions.

This is the only twin tip model in our touring range, a ski designed to offer joyful adherence, which allows better skiing with less effort. It is light, but does not trade weight for sensations, the Draco is for skiers who want to be wild and creative. Made to search and find happiness.

the nitty-gritty:

construction: semi-cap, cap in tip & tail for lightness & handling, ABS sidewalls underfoot

core: paulownia/ poplar/ fiberglass

floatation: high with 110mm at the waist

rocker: double rocker, great maneuverability, control & pivot

camber: classic camber underfoot with short ski/snow contact for more maneuverability

sidecut: slightly straight sidecut for more stability and better balance between firmness and maneuverability

flex: firm flex for stability and precision, with progressive flex in tip for comfort and efficiency

mounting point: -5cm

drilling: diameter 3.5mm x L 9mm

corvus freebird

**control
original
warrior**

description:

The choice of the true touring skiers, the Corvus Freebird benefits from a slight rocker rise in the tip, a dynamic tail and long sidecut. The result is a ski that is aggressive and particularly accurate when entering and exiting the curve, with a very energetic behaviour. Its titanium plate underfoot makes it safer to mount hybrid bindings. Life is always better with pink.

the nitty-gritty:

construction: semi-cap, ABS sidewalls all around

core: poplar

added material: glass & carbon fibers, titanal reinforcement under the bindings

floatation: good with 107mm at the waist

rocker: progressive front rocker and early rise tail for pivot control, maneuverability and floatation

camber: classic long camber with extended ski/snow contact for alpine style carving

sidecut: long curve radius for high speed stability & good grip

flex: firm flex for stability and precision, with progressive flex in tip for comfort and efficiency

reinforcement: Titanal plate under the bindings for a better screw retention

mounting point: -9cm

drilling: diameter 4.1mm x L 9mm
do not mount with telemark bindings

skins

Feeling smoother than a dolphin.

The pilus skin has the particularity of having a thin membrane that protects and seals the glue. Strong and durable, very practical and unaffected by temperature variations, the pilus is the ideal partner to climb serenely towards bliss.

Available in super light and ultra light membranes, those are light (even ultra light), very resistant and 100% waterproof. Their hybrid composition (mohair / nylon) makes for an excellent ratio of hold when climbing and glide when descending.

Made with a fluorine free water repellent material for a smaller ecological footprint (much better for the dolphins).

pilus super light

description :

description:

A refined new model designed for the piste and its surroundings: the Sato is a ski bursting with joy. Precise, playful and eye-catching, this small ski loves to carve on immaculate slopes, have fun with the terrain or offer a few sessions between runs. A crystal-clear ski, a joyful ski, a blackcrows ski

Future resort star, the new Sato is a ski full of momentum that will delight those who like to spin along the slopes and roam the domains. With its median flex, it is playful and adapts easily to everyone's style, but it's also edge-holding and incisive for carving at speed. Its reasonable but consistent width makes it an all-terrain ski that can tame wild snow. A freedom-loving ski to ignite your sensual curves.

the nitty-gritty:

construction: semi-cap, ABS sidewalls all around

core: poplar / fiberglass

floatation: intermediate with 90mm at the waist

rocker: double rocker, great maneuverability, control & pivot

camber: classic medium camber underfoot with intermediate ski/snow contact for a great balance between stability and handling

sidecut: slightly short sidecut for good carving & reactivity

flex: tolerant & progressive flex to be comfortable in curves and efficient in all terrain
