FALL WINTER 2025/26

**FALL WINTER 2025/26**

**Designed by Candide with premium quality materials, innovative shapes and camberlines, Candide Skis is the pinnacle of a lifetime of research.**

## TECHNOLOGY

**C-LIGHT WOOD/  
CARBON CORE**

**ADAPTIVE ROCKER  
PROFILE**

**FSC CERTIFIED  
WOOD CORES**

**EU**

**HANDMADE IN THE  
EUROPEAN UNION**

**TRIPLE RADIUS  
SIDECUT**

**DUAL MOUNTING  
POINTS**

**BIO-BASED  
EPOXY**

**Y2**

**TWO YEAR  
WARRANTY**

## MATERIALS

### C-LIGHT CORE

A strong yet lightweight core construction of paulownia and poplar wood, sandwiched between layers of fibreglass and carbon weave. The most durable, lightweight core we've seen in over twenty years manufacturing skis.

### CORUND TOPSHEET

A chip-resistant lightly textured topsheet that protects against scratches to keep your skis looking fresh.

### P-TEX 4000 BASES

The fastest, most durable production bases you can get.

### ROCKWELL STEEL EDGES

Heat-treated steel built to last.

## SHAPE+FLEX

### TRIPLE RADIUS SIDECUT

A Candide first, our sidecuts feature three separate radii as you move from tip to tail. A tight tip radius makes turn initiation quick. A larger radius in the tail gives a powerful release to the turn and stability at speed. Finally, an even larger radius underfoot means wherever you mount it, the ski will feel consistent.

### TAPER

The fatter the ski, the more taper we put from the tip to the tail to help the ski float in powder.

### FLEX

We like our skis with a smooth flex over the length of the ski. Our Resort ski has a softer flex to give better feel on piste and in the park, while our BC and AK skis have progressively stiffer flex to retain control and feel at speed.

## CAMBERLINES+MOUNTING

### ROCKER

Rocker in the tip and tail helps a ski float off-piste. So, the wider the ski, the more rocker we've added. Our Resort ski has a small amount of rocker, the BC a healthy dose, and the AK a LOT.

### CAMBER

Camber underfoot makes a ski responsive on piste, but harder to ski off-piste. So, our Resort ski has the most camber, the BC a little and the AK none. Makes sense, doesn't it?

### DUAL MOUNTING POINTS

If you've played with mounting your skis in different positions, you'll know what you like. For guidance, we've marked two positions on the ski - Candide's personal mounting point, and a 'Regular' mount point that suits most skiers and terrain.

**We believe there is an everlasting link between nature and riders. We take measures to create products in the most eco-conscious way, and continuously look for new and improved ways to give back.**

### **FSC WOOD**

The Forest Stewardship Council A. C. is an international non-profit, multistakeholder organization established in 1993 that promotes responsible management of the world's forests, via timber certification.

All our wood core is FSC certified.

### **BIO-BASED EPOXY**

Our factory has been pioneering the use of bio-based epoxy for many years. This replaces the petro-chemical with renewable materials such as vegetable oils.

This process retains all the strength of a traditional epoxy resin.

# AK 121

SKF25A-CTAKU

179 • 184 • 190

All marked measurements are for 184cm.

## C-LIGHT CORE

→ A proprietary mix of paulownia and poplar woods, wrapped in fibreglass and carbon gives a lightweight yet incredibly strong ski full of pop.

## TRIPLE RADIUS SIDECUT

→ Three radii blended together for quick turn initiation, stability at speed and mounting versatility.

- Tip radius: 21m
- Waist radius: 27m
- Tail radius: 23m

## POWDER ROCKER

→ Lots of tip and tail rocker with flat camber underfoot. Maximum float and instant edge response.

## DUAL MOUNTING POINTS

→ Candide's or Regular.

## PERFORMANCE

## WEIGHT

**2,000**  
G/ski @184cm

## LENGTHS

BASE

# AK YOUTH

SKF25A-CTAYU

147 • 157 • 167

All marked measurements are for 167cm.

## C-LIGHT CORE

→ A proprietary mix of paulownia and poplar woods, wrapped in fibreglass and carbon gives a lightweight yet incredibly strong ski full of pop.

## SINGLE MOUNTING POINT

→ Progressive.

## TRIPLE RADIUS SIDECUT

→ Three radii blended together for quick turn initiation, stability at speed and mounting versatility.

- Tip radius: 15m
- Waist radius: 25m
- Tail radius: 17m

## FREERIDE ROCKER

→ A generous amount of tip and tail rocker with 1mm camber underfoot gives a responsive, lively feel all over the mountain.

## PERFORMANCE

## WEIGHT
