hardgoods collection

The freshness of a snowy morning when the mountains wake up and reveal enchanted worlds. The skis are ready to tackle the various appearances of the white surface. While some will head for the cable cars, others will attach skins to their soles. Skiing, like snow and mountains, offers a multitude of variations depending on desires and objectives.

To celebrate 20 years of blackcrows, our 26/27 ski range celebrates the infinite variations and pleasures of skiing. Four flagship models have been completely modernized, while a new model designed for the joy of ski resorts has been introduced. Three new intuitive and lightweight climbing skis and their dedicated skins are now available for their mounts, a new versatile adjustable

pole model for those who alternate between downhill skiing and touring, and a renowned pole designed for adventure that has been thoroughly revamped. It is under the sign of renewal that we celebrate the diversity of practices. The third millennium will be marked by freedom—your freedom.

Bon ski.

touring

let's get lost

From aerial finesse to wingspan and lift, our range has always aimed to satisfy the desires of summit seekers. A comprehensive range whose evolution has made it renowned, and which continues to modernize to accompany our irrepressible desire for adventure.

Three iconic models are affected by this transformation of our freebird fleet: the orb freebird, the camox freebird, and the navis freebird. Substantial weight reduction, new sidecuts, new curve radius, new dimensions, and new lighter and more intuitive skin attachment systems mark a new technological milestone for these three iconic skis.

The graphics have also evolved with a refined, minimalist topsheet featuring tiny chevrons arranged in a compass pattern.

skins

Feeling smoother than a dolphin

As a cornerstone of freedom in the mountains, we chose to invest in the development of climbing skins from the very beginning.

Today, we offer a renewed collection with unique attachment system designed for our legendary models: the orb freebird, camox freebird, and navis freebird, as well as our draco freebird. Lighter, more compact and durable, welcome to a more intuitive and simplified attachment system. The pilus is, evermore, the ideal companion for climbing serenely towards bliss.

new navis freebird

**Spirited
Legendary
Concupiscent**

description:

The fourth generation of the Navis freebird has undergone extensive modernization and has become the spearhead for touring skiers thirsty for descents.

With a refined tip and a waist width of 104 mm for equivalent floatation, the new Navis freebird is both lighter, with a weight reduction of around 10%, and more maneuverable. It also has better grip and increased stability. With its new 21-meter radius, it encourages you to let loose and fully enjoy the wide open spaces conquered by the power of your legs. A new sizing system from 165 to 186, adds to the appeal of this mountain beast, built for any challenge.

the nitty-gritty:

floatation: good with 104mm at the waist

rocker: progressive front rocker for great stability in carving and early rise tail to secure support and to facilitate pivoting

camber: classic medium camber underfoot with intermediate ski/snow contact for a great balance between stability and handling

sidecut: slightly straight sidecut for an attacking soul

flex: firm flex for stability and precision, with progressive flex in tip for comfort and efficiency

reinforcement: Titanal plate under the bindings for a better screw retention

mounting point: -9cm

drilling: diameter 4.1mm x L 9mm

do not mount with telemark bindings

skins

new

navis pilus freebird

description :

The new Navis freebird specific Pilus skins feature a hooking system with a notch in the tip and near the tail. This device reduces length of the skins by approximately 20 cm, resulting in a weight reduction of more than 10%. Externally, they are more intuitive and can be hooked on quickly and securely. Intrinsicly, they are composed of a thin, lightweight, highly resistant, and 100% waterproof membrane. Their hybrid composition (mohair/nylon) offers an excellent grip/glide ratio. Their water-repellent material is fluorine-free, which reduces chemical components without compromising performance. The Pilus is therefore the ideal companion for climbing serenely towards bliss.

description:

The Bird of Paradise is enjoying its fifth rejuvenation and is still ahead of the curve when it comes to modernity. The new version of this iconic ski, forged in playfulness and versatility, has become a benchmark for mobility in the high mountains, offering increased lightness and grip. With a refined tip and wider waist, its new sidecut makes it more dynamic during weight transfers and more stable when edging. Its flexible and consistent flex, 18-meter radius, 10% weight reduction, and new climbing skin system make it the new weapon of choice for backcountry skiers who want a ski that performs equally well on the ascent and descent.

the nitty-gritty:

- floatation:** good with 97mm at the waist
- rocker:** progressive front rocker and early rise tail for pivot control, maneuverability and floatation
- sidecut:** slightly short sidecut for good carving & reactivity
- flex:** solid flex underfoot for stability and precision, then progressive in tip and tail for comfort and efficiency
- reinforcement:** extra fiberglass under the bindings for a better screw retention
- mounting point:** -9cm

attractive

description:

Dressed in its famous one-piece fluorescent yellow, the Orb Freebird is a reference in ski touring.

The Orb freebird is undergoing its fourth modernization and continues to write the history of touring. With a refined line, enhanced flex, and lighter weight, this modernization respects the fundamentals of this ski, which was originally designed for precision on descents. Narrower sidecuts at the tips and tails, but wider at the waist, maintain good float while improving grip, especially on steep slopes. Its 18-meter radius remains unchanged, respecting the balance of its DNA as a ski with excellent skiability and extreme safety when it comes to being cautious on the descent. It also features a new intuitive and lighter climbing skin system. Bon voyage.

the nitty-gritty:

floatation: intermediate with 91mm at the waist

sidecut: slightly straight sidecut for more stability and better balance between firmness and maneuverability

flex: solid flex underfoot for stability and precision, then progressive in tip and tail for comfort and efficiency

big mountain

The size does matter.

Once again, our Big Mountain range pushes the limits of our imagination, and maybe yours, to a place that is dear to us, that sees us rise and expand our scope. We want to progress, always, to push forward the widest skis in our range, the most crucial ones, those that carry crows from all horizons to the wildest and most extreme conditions.

Let's all find the way to our magic mountain. The one that delights us all. The one where the wild crows hover, as if waiting for our eager tips to carve the widest powder turns.

a stratosphere of delights

all terrain

How did you do that?

Our all-terrain range covers diverse types of skiing and cultural styles, from bold carving skiers to crazy all around powder hounds. Indeed, it involves all skis dedicated to lift accessed fun, on and off the pistes. Because we want all our skis to behave on natural snow, whatever their width.

Here are ambitious skis that will bring chevron in every shape of curve, on every aspect of the ski resort.

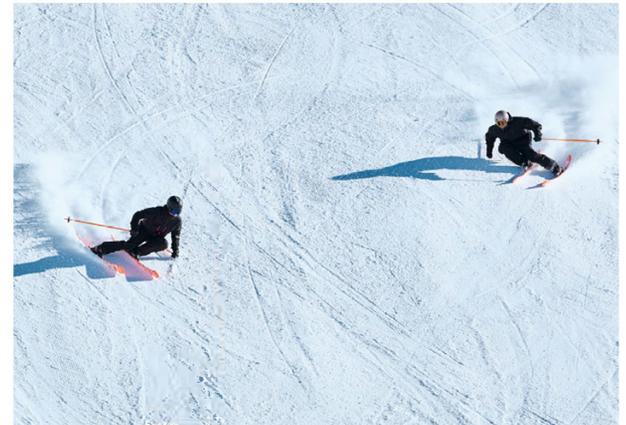

all terrain

vena cor

The wild bird.

Our all new all terrain purist.
Made to go anywhere, it is a legend
in the making.

pure

description:

A new wild bird designed for all-terrain skiing, equally at home on the slopes as in deep powder, the Vena Cor is a ski that does everything, but better. With excellent float, a short radius, and a double rocker profile, this ultra-versatile ski thrives on all surfaces and in all conditions. Very playful and precise on the edge, it loves carving as much as it loves speed. Its DNA bears the mark of freestyle and encourages you to have fun with the terrain, while its freerider lift invites you to revel in deep or choppy snow. Its look, worthy of the blackcrows aesthetic, completes a very high-level resume for a ski that has all the makings of a legend.

the nitty-gritty:

floatation: good with 100mm at the waist

rocker: double rocker with sh tail, great maneuverability, control & pivot

camber: classic medium camber underfoot with intermediate ski/snow contact for a great balance between stability and handling

sidecut: slightly short sidecut for good carving & reactivity

flex: intermediate over the entire length of the ski, performance and forgiveness

mounting point: -5cm

drilling: diameter 3.5mm x L 9mm

camox carry over

intuitive
versatile
legendary

description:

The fourth generation of our all-terrain virtuoso, the new Camox perfects its qualities with a shortened radius, a more homogeneous flex and a more responsive pivot. Like its subtly sensory exterior, it expresses new sensations while asserting its exceptional versatility.

More intuitive than its predecessor, its riding sensations have evolved considerably. It makes the most of its freestyle heritage, giving free rein to its joyful ease on any terrain. The finely sloped surface on the contours, playing with reflections, manifests the great revival of this emblematic model.

the nitty-gritty:

construction: semi-cap, ABS sidewalls all around

core: poplar + ash pocket reinforcement / fiberglass

floatation: good with 97mm at the waist

rocker: double rocker, great maneuverability, control & pivot

camber: classic medium camber underfoot with intermediate ski/snow contact for a great balance between stability and handling

sidecut: slightly short sidecut for good carving & reactivity

flex: tolerant & progressive flex to be comfortable in curves and efficient in all terrain

reinforcement: ash pocket underfoot

mounting point: -6cm

drilling: diameter 3.5mm x L 9mm

style code: 102365

serpo carry over

lively
tolerant
versatile

description:

The Serpo is a young and lively ski in the range for curving on the piste and poking a bit off-piste.

With 93mm at the base, it is a good carver, it is there to really play with the terrain with its tolerant flex but it also has positive response thanks to its metal layer for grip and stability: For all that, its performance does not erase the ease and pleasure of the game.

the nitty-gritty:

construction: semi-cap, ABS sidewalls all around

core: poplar / fiberglass

added material: double titanal plates underfoot

floatation: intermediate with 93mm at the waist

rocker: progressive front rocker and early rise tail for pivot control, maneuverability and floatation

camber: classic camber underfoot with short ski/snow contact for more maneuverability

sidecut: slightly straight sidecut for an attacking soul

flex: energetic with double titanal plates underfoot for a better response

mounting point: -8cm

drilling: diameter 4.1mm x L 9mm

mirus cor carry over

playful
modern
carver

description:

The Mirus Cor is a ski object born of performance and design, to achieve an alliance between two worlds: freestyle and the most angular carves of the moment. Built with a long rocker tip and tail, it can be skied short to play with piste and the most playful sidehits. It is carving in a blackcrows way, a true freestyle all terrain. Accessible, solid and creative in every respect. COR The Cor blackcrows acronym is displayed on products that seek to disrupt the practice and push the innovation on the snow. With no boundaries.

the nitty-gritty:

construction: semi-cap, ABS sidewalls all around

core: poplar / berglass

added material: single titanal plate

floatation: intermediate with 87mm at the waist

rocker: double rocker with sh tail, great maneuverability, control & pivot

camber: classic medium camber underfoot with intermediate ski/snow contact for a great balance between stability and handling

sidecut: very short radius, super reactivity with a fast edge to edge transition

flex: energetic with a very good grip all along the ski for high performance but still very playful

mounting point: -3.5cm

drilling: diameter 4.1mm x L 9mm

description:

A refined new model designed for the piste and its surroundings: the Sato is a ski bursting with joy. Precise, playful and eye-catching, this small ski loves to carve on immaculate slopes, have fun with the terrain or offer a few sessions between runs. A crystal-clear ski, a joyful ski, a blackcrows ski.

Future resort star, the new Sato is a ski full of momentum that will delight those who like to spin along the slopes and roam the domains. With its median flex, it is playful and adapts easily to everyone's style, but it's also edge-holding and incisive for carving at speed. Its reasonable but consistent width makes it an all-terrain ski that can tame wild snow. A freedom-loving ski to ignite your sensual curves.

furtis

description:

The beast. With its minimalist look, the Furtis is a great mountain companion for skiers looking for a light and strong pole.

Built on a 22mm diameter tube, 100% composite, it is very durable and ultra-light thanks to an inconspicuously elastic structure, capable of absorbing impacts. The Furtis also benefits from a long, slimmed-down top grip for easy handling and a harness-inspired hand strap attached to a sturdy cap. It is also fitted with a flexible basket which adapts perfectly to the variations of the terrain.

the nitty-gritty:

tube : carbon, 22mm diameter

grip : 38cm extra long, EVA foam

strap : mountain style

top cap : reinforced anodised aluminium

basket : flexible, 90mm diameter

tip : tungsten carbide

size : 110-135

stans

description:

The Stans is a carbon pole to feel the speed at your fingertips, with style, for skiers who like lightness and reactivity.

Aggressive and efficient, it is built around a 13mm shaft with a specific handle. Its angular morphology allows a very good grip: it is accompanied by a comfortable and easy to handle strap. On the print side, the Stans has a very resistant compact basket and a steel tip. Available in three unique colours, everyone will be able to find the pair that matches their skis, their outfit... Or better still, their spirit.
