# What's new

**Liner comfort**

**Void S**

**Photochromic blue**

# Liner comfort

## Premium look and perfect fit

The Liner Comfort helmet takes comfort and fit to the highest level: a  
clean, premium look thanks to the faux leather exterior, and an ultra  
soft inner lining that ensures the perfect head fit on every ride.

# Void S

**6.5% smaller**  
**100% Void**

---

Void S brings the same clean design and premium performance as Void,

---

now in a 6.5% smaller frame made for narrower faces.

---

At just 120 grams, it stays incredibly light while delivering a massive

---

200° field of view.

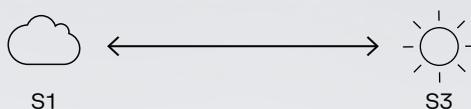

---

# Photochromic Blue

From flat light to full sun, the Photochromic Blue lens adapts seamlessly from category 1 to 3, ensuring clear vision in every condition. Its subtle blue mirror cuts glare and refines brightness, while the rose base tint enhances contrast and definition in low-light environments such as undergrowth, foggy or cloudy days.

**Available on:**

Void S

# Products overview

### Electra 3

The third generation of ski goggles with IRID® electronic lenses

---

### Zenith

2 second magneto-mechanical lens change system

---

### Bio project

Bio project, our first line of bio-based ski goggles

---

### Void

215° of field of view & 129 grams of weight

### Void S

Void performance, 6.5% smaller

---

### Katana

Sleek design, 6 seconds lens interchange system and optimized field of view

---

### Flat

The perfect entry-level pair of goggles

---

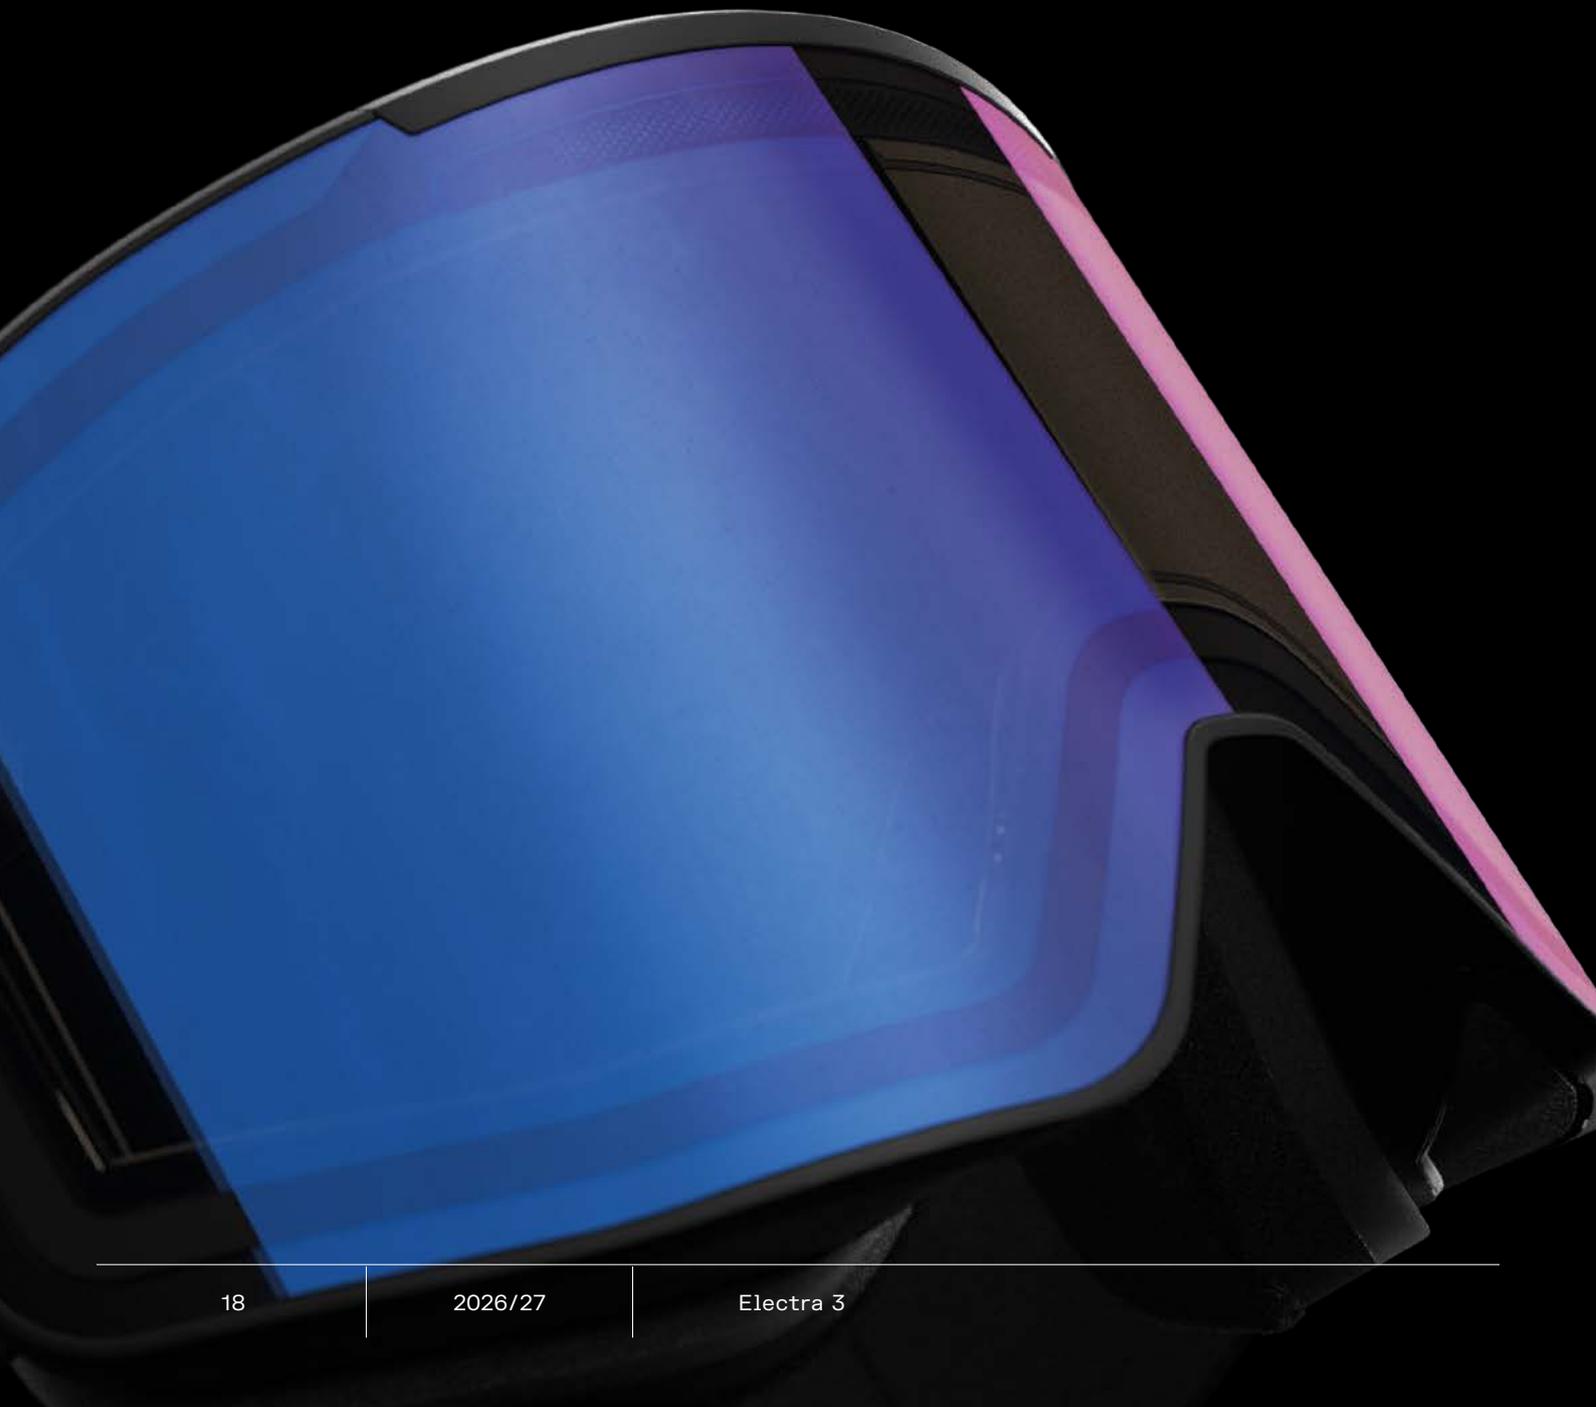

### Liner

All the protection you need in a lightweight helmet

# S1 to S3 in less than 1 second

# Electra 3

The third generation of ski goggles with IRID® electronic lenses.

---

S1 to S3 in less than 1 second. Optimized mirroring.

---

Field of view: 218° horizontal.

---

Made in Italy. Suitable for medium to wide faces.

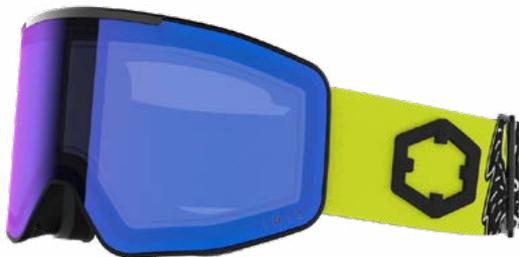

---

Available with IRID® lens.

Rigid parts (buckles and lens' frame): RILSAN® CLEAR G 850 Rnew.

---

Microfiber pouch and elastic band: recycled.

---

Made in Italy. Suitable for medium to wide faces.

---

Available with Zeiss lenses.

---

# Our line of bio based ski goggles

As a B-Corp our mission is to create products that are not only technically amazing, but that have a positive impact on the world and the people we come across. Bio project, our line of bio-based ski goggles, is our act of change.

**Frame: PEARLTHANE™ ECO TPU**

Pearlthane™ is a renewable source-based TPU. The renewable part is extracted from castor oil and the end material contains up to 46% of bio-based material. Castor oil, known since 2000 B.C., is obtained by squeezing the seeds of the *Ricinus communis* plant. Furthermore, Pearlthane™ performs even better than non-bio-based TPUs since it maintains better flexibility at low temperatures.

**Rigid parts (buckles, lens frames): RILSAN® CLEAR G 850 Rnew**

It is a high performance copolyamide specifically designed for high end optical frames, that contains up to 51% of renewable carbon.

**Microfiber pouch and elastic band: recycled.**

Both the elastic band and the microfiber pouch are made with recycled textiles with the GRS (global recycled standard) certification.

This is a beginning, a first step towards products that don't put our winters and our beloved outdoors at risk, without compromising on performance, durability and looks that are always at Out Of's core.

Combining bio-based materials to products that are meant to be repaired and restored, rather than thrown away at the first sign of aging, we can truly start making an impact.

# Tech overview

I R I D

Electronic lenses

The award-winning instantaneously photochromic and battery-free lenses

---

THE ONE

Photochromic & polarized lenses

Photochromic and polarized to ride in any condition, always seeing well: now 67% more resistant

---

LENSES BY

Zeiss lenses

Amazing optical clarity, with premium Ri-pel oleophobic and hydrophobic treatment

---

STORM

Storm lenses

Enhanced contrast in whiteout situations, to enjoy riding even in the toughest conditions

---

**Premium anti-fog**

Premium anti-fog treatment

Second-to-none anti-fog coating to let you enjoy the sweatiest of ski days, fog free

# IRID

Patented

The award winning electronic lens

red dot winner 2024

# Instantaneously photochromic, electronic, without batteries

IRID's third-generation of lenses takes adaptive tinting to the next level, transitioning between S1 and S3 tints in less than a second. With a reduced solar cell size—half of the previous version—it retains the same power and is still 100% waterproof and of course battery-free.

**Technology available on:**

Electra 3

# THE ONE

Photochromic & polarized lenses

Chemically reacting to UV rays, photochromic lenses adjust their tint to light

providing the best light filter. Polarization selectively blocks horizontal reflections.

Reaction time: 15 seconds to 3 minutes. Perfect for slow light changes.

THE ONE

# Photochromic & polarized

## Now 67% more resistant

A new mirroring treatment that is engineered to withstand plenty  
of challenges. so resistant that it passed the Q-UV cross-hatch  
adhesive-tape test for over 120 hours. Now on all The One lenses.

**Technology available on:**

Void      Katana

LENS BY **ZEISS**

# Zeiss lenses

We trust no less than Zeiss for our base polycarbonate lenses. Arguably the most important lens producer in the world, Zeiss provides lenses that are almost unbeatable for optical clarity and overall quality. All our Zeiss lenses come with a premium Ri-pel treatment, oleophobic and hydrophobic treatment.

**Available on:**

Zenith

Void

Void S

Katana

Contrast boost

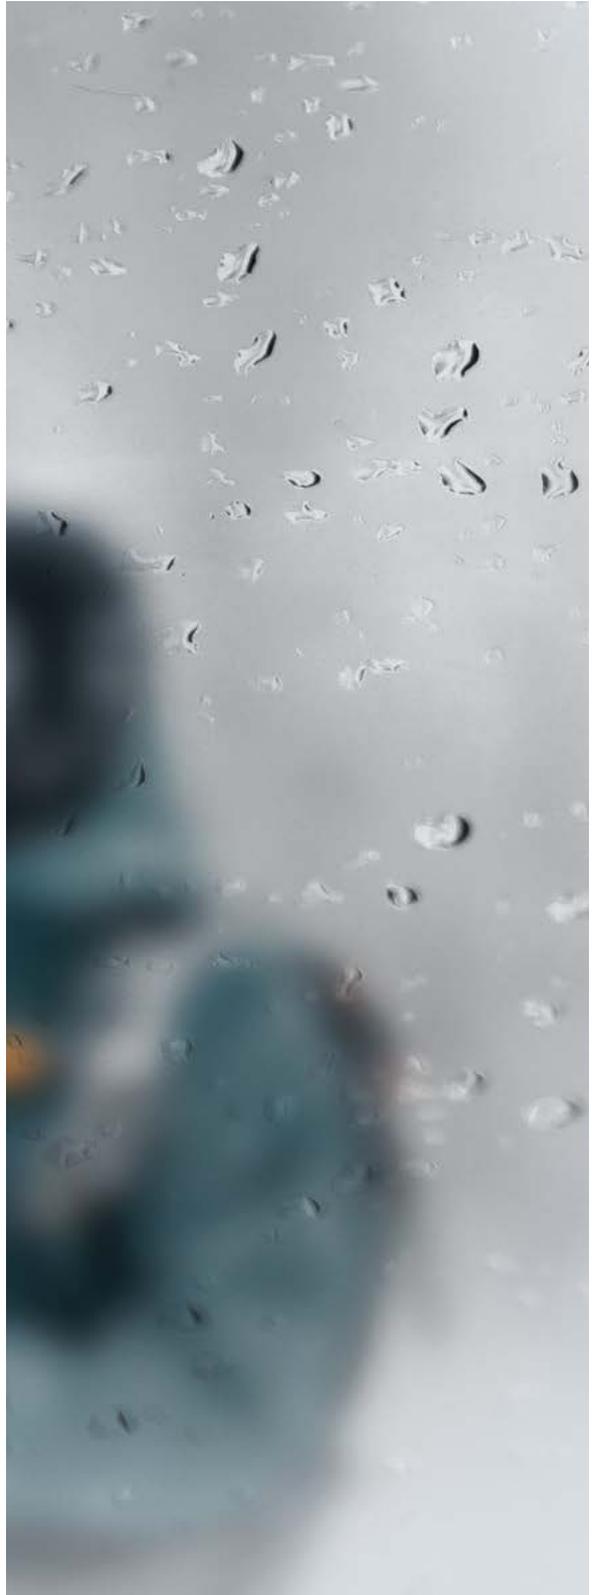

# Storm lenses

**Save your day pass  
when the weather  
doesn't cooperate**

A contrast boost right when you need it the most. The Storm allows you to keep on riding, when others call it a day. Developed with professors from the Department of Physics at the University of Milan and produced by Zeiss, it is specifically designed to improve perception of shapes in whiteout conditions.

**Available on:**

Zenith      Void      Void S      Katana

# 5 times more anti-fog

Compared to our main high end competitor.

---

Enjoy fog free ski days.

---

Now on all our lenses.

---

**Available on:**

All goggles\*

\* excluding the 'Flat' model

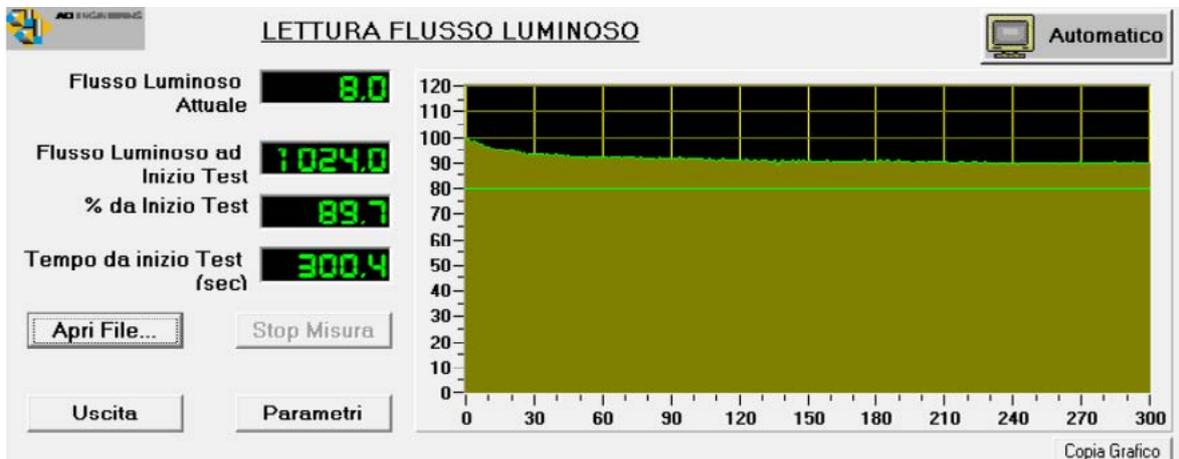

# **Saying “anti-fog” is easy. Proving it is a little less so.**

There are plenty of so-called “anti-fog” lenses on the market.

That’s because the EN166 standard defines “anti-fog” as any lens that resists fogging for at least 8 seconds – which, in real use, isn’t nearly enough.

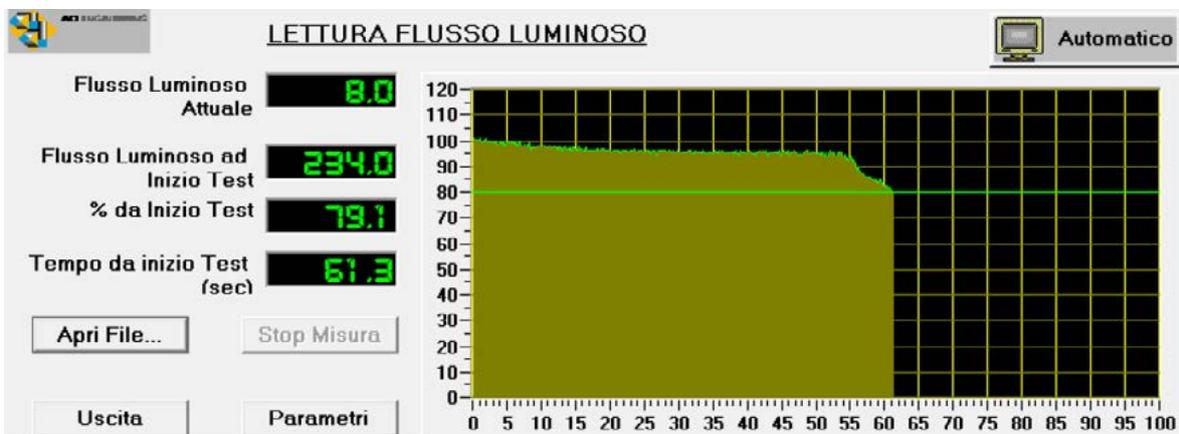

Our lenses withstand 300 seconds in the anti-fog test – the maximum limit the testing machine can record.

**OUT OF**

RESISTANCE OF OVER 300 SECONDS - ECE W028 TEST

**COMPETITOR**

RESISTANCE OF 62 SECONDS - ECE W028 TEST

**In other words: our lenses stay perfectly clear long after the others have completely fogged up.**
