RIDE, PROTECT & SHARE

these three words represent the essence of who we are: a snowboard, ski, surf, and outdoor clothing brand who, while not taking ourselves too seriously, still want to effect change.

Do you know what's behind Picture?

Sustainable materials

Using business as a force for good

Climate & carbon strategy

Fair and ethical production

Packaging policy to eliminate polybags

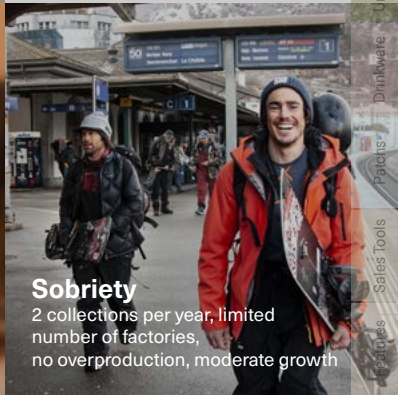

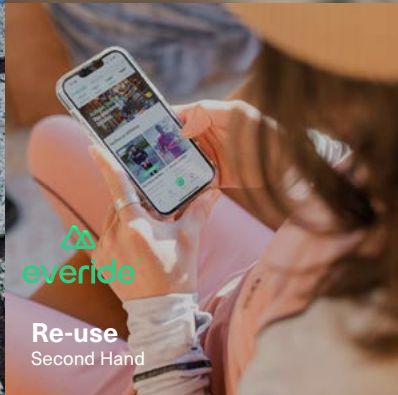

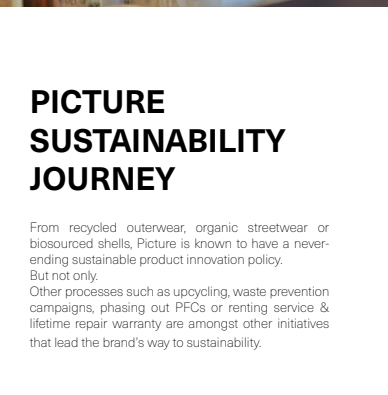

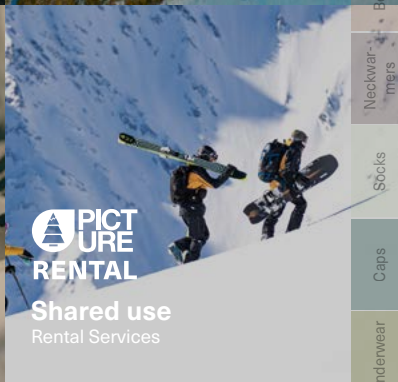

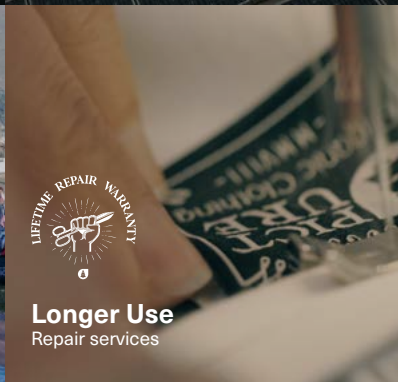

THE PICTURE MUSEUM

From day one and as an unconventional outdoor brand, we've always had the desire to surprise and impress with a brand DNA that is creative, artistic and offbeat. Each season, we strive to create innovative campaigns to bring our products to life through original universes, always with the objective of telling great stories.

This season, to highlight our new collection, we are returning to our first love and one of the pillars of the brand: the world of architecture, through «The Picture Museum».

How? By imagining a universe shaped by unusual structures, in which everything is allowed: mixtures of forms, codes and architectural styles; and ever more exuberant materials.

In this museum conceptualised by our imagination, nothing is left to chance and every detail is important. The objective? To destabilise, to impress, to stimulate the imagination and to leave a mark on the mind; all the while making our vision evolve, always in search of the new and the extraordinary.

BAGS & LUGGAGE

Since every journey has its own story, we like to create bags & luggage for those who seek true adventure.

Our bags offer streamlined and versatile storage options for skiing, hiking, camping, train travel, bike trips, and even urban escapes. All the more reason to enjoy the unexpected! Every bag from our product line uses recycled polyester and recycled buckles made in socially-responsible factories. And of course, we take care to make long-lasting and durable, too: the entire line is covered by our lifetime repair warranty program.

SUSTAINABILITY

DURABILITY

100% of the bag range is covered by the Lifetime Repair Warranty which cover:

Zips

Buckles

Seams*
* Conditions apply

Webbing

UPCYCLING

If for some reason you end up wearing your backpack out, give it a second life by cutting "along the dotted line" to transform your pack into separate accessories.

- Upcycling is one initiative among others leading the brand down the path to circularity.

-Even our toughest backpacks won't last forever: from the very beginning we thought of the end of the product lifecycle.

-For all backpacks in the collection.

GLOVES

We design our gloves and mittens to address every rider's needs, from lightweight Touring gloves to 3-in-1 insulated options for harsher, more extreme conditions.

And never fear, you'll always find the right color to match your outfit!

Even with so many high-end technical features, our gloves are still just as ecofriendly as always, made with recycled polyester from garments or PET bottles and a PFC-free DWR finish. This year we also worked on re-structuring the range to make sure that everyone finds their perfect match in terms of warmth, style, and budget.

1

Windbreaker Gloves

Light gloves, designed for high intensity activity such as ski touring & splitboarding. Its softshell fabric will provide wind protection while the polar fleece lining will wick the moisture away and keep your hand dry all the way up! It can also be a good choice for urban use in winter: biking, commuting...

CAPS

4 PROFILES IN RANGE

ULTRA LOW PROFILE CAP

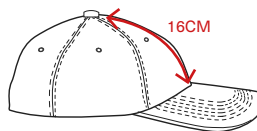

Also known as the dad cap fit, our low profile provides a tight fit, with a shallow volume. Is the perfect choice for those who like a cap that sits above the ears.

SEAM BETWEEN VISOR AND TOP : 15CM

LOW PROFILE CAP

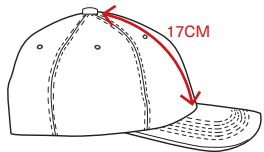

A bit roomier than the dad cap fit, still tight. The cap will sit above ears with a better coverage than the dad cap.

SEAM BETWEEN VISOR AND TOP : 16CM

MID PROFILE CAP

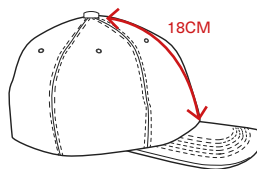

Not too small, not too roomy, our mid profile stands perfectly in between a low and a high profile. It provides a little space between your head and the top of cap.

SEAM BETWEEN VISOR AND TOP : 17CM

HIGH PROFILE CAP

Picture historic fit. Very roomy, perfect for those who are used to large hat size.

SEAM BETWEEN VISOR AND TOP : 18CM

DRINKWARE

Since drinking water and plastic do not mix so well together, we have expanded our drinkware range. From insulated cups and tumblers for your morning coffee by the campfire, to leak-proof bottles for strenuous hikes, by way of new insulated small-mouth options for commuting, we've got every size and volume you could possibly imagine. Did we mention that they are super stylish as well?

PATCHES

Picture has always been engaged in the durability of its clothes. Whether it is by the quality of the materials and seams used, the recycling principle or upcycling... It is possible to act in many ways on the durability, and we continue to invest fully on this axes.

There is another way to extend the life of your clothes and notably the REPAIR. This is the point where our new label «Repair&Reuse» comes in this year. Requested by our after-sales service and our picture family, we will make it easy to repair your garments through repair patches this year.

**REPAIR
& REUSE**

We decided to create a section composed of articles that will be used to repair, care and protect your clothing and accessories. Located on our website, a Qr code on our products will also give you direct access to this page.

TECH FEATURES

WATER REPELLENT

Thermal Gloves

Light and breathable, perfect for urban use in winter or very high intensity activities such as touring and splitboarding. It can also be used as an inner glove.

WATER REPELLENT

Windbreaker Gloves

Light gloves, designed for high intensity activity such as ski touring & splitboarding. Its softshell fabric will provide wind protection while the polar fleece lining will wick the moisture away and keep your hand dry all the way up! It can also be a good choice for urban use in winter: biking, commuting...

WATERPROOF

MOISTURE
WICKING

Insulated Gloves

Our mid-range selection made for riders seeking a performing waterproof insulated glove. Its 10K/10K Dryplay membrane & insert as well as the 170gr insulation will protect you against cold conditions.

WATERPROOF

MOISTURE
WICKING

Heavy-insulated gloves

The best selection in the range. Dedicated to snowsports enthusiasts looking for the ultimate waterproof insulated gloves. Its 20K/20K dryplay membrane & insert as well as the 220 gr insulation will protect you against the toughest conditions.

TECH INDEX

CORDURA®:
Cordura® fabric is a collection of fabrics qualified by INVISTA for use in a wide array of products from luggage and backpacks to boots, military wear and performance apparel.

DRY NOW:
High-performance technology using a recycled polyester blend of hydrophilic and hydrophobic fibers that wicks moisture away

DRYPLAY:
This polyurethane (pu) blend laminate membrane is waterproof, windproof, and breathable. Extremely durable, it keeps the user dry in all weather conditions. Laboratory and field tested.

DRY FEEL:
Our new antimicrobial and anti-odor treatment that keeps your base layers as fresh as it was new for more active days. It also means less frequent washing and longer lasting clothes!

POLARTEC® POWER STRETCH®:
Made with 84% recycled fibers and developed to expand our base fabric's durability and range of motion. By using elastic fibers with enhanced resilience in our stretch construction, we made a performance-fit base fabric that can handle the demands of intense physical activity. It also keeps you dry when you sweat and provides warmth.

PRIMALOFT:
The world's best synthetic insulation alternative. PrimaLoft® insulation is soft, water resistant, warm without bulk, breathable, lightweight, and packable. At Picture we use PrimaLoft® insulation ECO with 60% post-consumer recycled

REPREVE
is the leading, most trusted, branded performance fiber made from recycled plastic bottles. The process embeds properties like wicking, adaptive warming and cooling, water repellency, and more at the fiber level.

THERMAL STD:
Made with thin recycled polyester fibers, our Thermal Std insulation provides warmth similar to down, but retains heat more effectively when it gets wet. It is lightweight and dries quickly. The heavier the weight in grams, the warmer the insulation.

TEFLON ECOELITE:
PFC-Free durable water repellent treatment using renewably sourced Teflon EcoElite™ Technology. Zero pollution, zero allergies, zero impact on future generations. Guaranteed 90% efficiency after 10 washes.

GREEN CERTIFICATIONS

BLUESIGN APPROVED FABRIC

Bluesign technologies works at each step in the textile supply chain to approve chemicals, processes, materials and products that are safe for the environment, safe for workers, and safe for the end customer.

GLOBAL RECYCLED STANDARD

The Global Recycled Standard provides verification of recycled materials, and then tracks the materials throughout the entire supply chain and to the finished product. It includes additional social, environmental, and chemical processing requirements.

LEATHER WORKING GROUP

The Leather Working Group is an organization whose members are stakeholders, right from tanneries to retailers, in the leather supply chain. The LWG has audit protocols to certify the environmental compliance of its leather manufacturing members – however, it does not certify farms or slaughterhouses. To ensure that leather manufacturers do not procure leather from areas connected to deforestation, transparency from material to sale is also given importance; it is, however, rated separately from environmental compliance which is the focus.

OEKO-TEX STANDARD 100

If a textile article carries the STANDARD 100 label, you can be certain that every component of this article (every thread, button and other accessories) has been tested for harmful substances and that the article therefore is harmless for human health.

TEFLON ECOELITE™ / PFC FREE DURABLE WATER REPELLENT TREATMENT

Teflon EcoElite™ is a renewably sourced, non-fluorinated (PFC-free) fabric treatment for durable water repellency and is manufactured with 60% renewably sourced raw materials.

RESPONSIBLE WOOL STANDARD

The Responsible Wool Standard is an independent, voluntary standard administered by the Textile Exchange and developed with relevant stakeholders including farmers and animal welfare and land conservation experts to recognize the best practices in sheep welfare and land management for growing wool.

SUSTAINABLE FABRICS AND PROCESSES

THE CIRCULAR :

The Circular is part of our never-ending sustainability research, and is a technology that uses existing waste within our own industry to make new yarn for a new technical fabric. The Circular_process is 2 times less polluting than Biosource, and the waste comes from 40% Post consumer (used garments) and 60% Pre consumer (factory cutting scraps)

POLYLANA®

PolyLana® Fiber offers brands and retailers a sustainable choice. The same 'wool like' hand feel and characteristics as acrylic fiber, but with a significant lower impact. Consumers will enjoy the same quality, the same value, but with an additional emotion of doing better.

REPREVE :

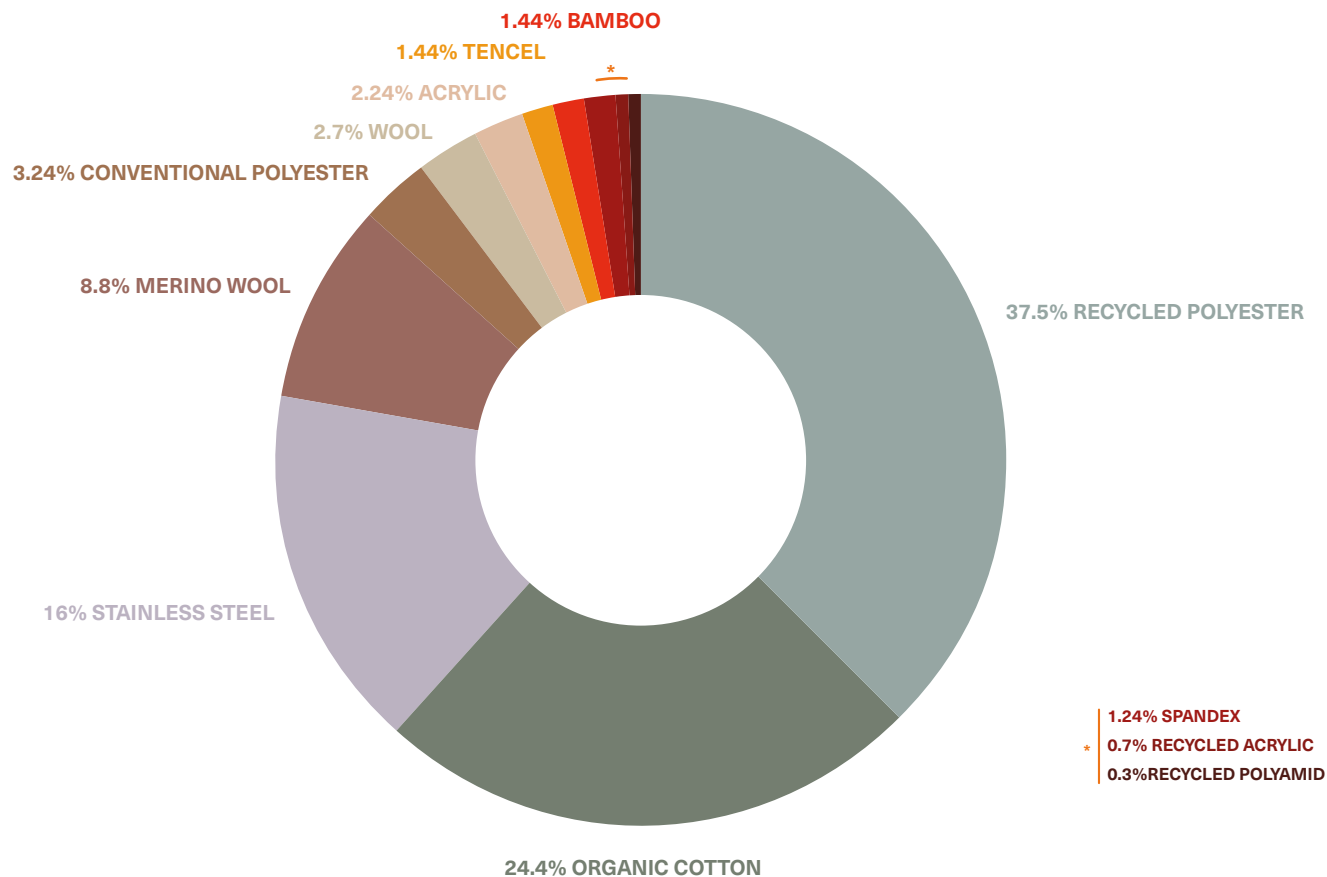

REPREVE is the leading, most trusted, branded performance fiber made from recycled plastic bottles. The process embeds properties like wicking, adaptive warming and cooling, water repellency, and more at the fiber level.

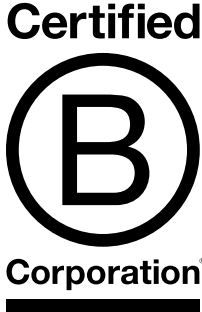

RECYCLED POLYESTER :

Recycled polyester has much lower impacts than virgin polyester: it requires 6 times less oil and emits 2.5 times less greenhouse gases than conventional polyester.
